94th GENERAL ASSEMBLY
HOUSE OF REPRESENTATIVES
TRANSCRIPTION DEBATE

15th Legislative Day

2/16/2005

Speaker Madigan: "The House shall come to order. The Members shall be in their chairs. We ask the Members and our guests in the gallery to turn off their laptop computers, cell phones and pagers. And we ask our guests in the gallery to rise and join us for the invocation and the Pledge of Allegiance. We shall be led in prayer today by the Reverend Lee Fields, Jr. of the Pleasant Grove Baptist Church in Springfield, Illinois. Reverend Fields is the guest of Representative Arthur Turner."

Reverend Fields: "Let us bow our heads. Eternal God, our Father, as we stand before Your awesome presence, we acknowledge You today. We pray now in the midst of this gathering of our political leaders that will take care of our state's business. That You would look down upon our ethnic groups, dear God, in their diversities and have mercy. But we thank You, dear God, that even in the midst of this meeting, we're celebrating a culture, a rich, fine African-American culture. We pray now, dear God, that You would strengthen and keep. We know that Thou art able. We pray now for the families that are left behind. We pray now, dear God, that You would sustain the homes of those who are present here today, let no fire break out, nor any thieves break in. That this Session will not be interrupted by tragedies of families or calamities or vicissitudes. We pray, dear God, for Your sovereign and sustaining grace. In Jesus' name we do pray. Amen."

Speaker Madigan: "We shall be led in the Pledge of Allegiance by Representative Turner."

Our Attorney General has a more immediate, more pressing and a lot more important chore that she's dealing with now but her

mother's here, Shirley Madigan, Ladies and Gentlemen. And of course, Lisa Madigan, our Attorney General. And there's one more acknowledgement I wanna make. Not a Constitutional Officer but like Galileo, during Renaissance Florence, a man who is sometimes maligned and I believe often misunderstood. But I'm hopeful that history will ultimately turn and show that he's been more right than wrong like they did for Galileo, only I hope it doesn't take about 260 years, our Budget Director, John Filan. Mr. President, Mr. Speaker, distinguished guests, my fellow citizens, I am submitting a budget today that is balanced. A budget that invests more money in our schools. A budget that provides health care for more men, women and children. A budget that funds new road projects, school construction, conservation and environmental cleanups. A budget that will create jobs. A budget that helps the CTA. A budget that does not raise the income tax or the sales tax. A budget that continues the change and reform we've started over the last 2 years. A budget, that I believe, sets all the right priorities. Over the last 2 years, we've dug ourselves out of the worst fiscal crisis in our state's history. We did it by bringing major structural changes to the way government works: \$3 billion in less spending outside of education and health care, 20 fewer agencies, and the smallest workforce in 30 years. Governing Magazine recently described Illinois as 'now undergoing one of the most dramatic reorganizations of any State Government in recent years.' That's a good start. But setting the right

STATE OF ILLINOIS
94th GENERAL ASSEMBLY
HOUSE OF REPRESENTATIVES
TRANSCRIPTION DEBATE

15th Legislative Day

2/16/2005

priorities can't just include more money for schools or health care or streamlining government or not raising taxes. The right priorities have to take into account both today and tomorrow. Right now, there are three costs in State Government that are growing so fast they threaten our very future. They remind me of a snowball rolling down a mountain. As it picks up speed, it gets bigger and bigger. And before long, if that snowball isn't stopped, that snowball could turn into an avalanche and bury anything in its way. Pension costs have snowballed, doubling over the last 5 years. This year we'll pay \$2.1 billion to the pension systems. Next year we'll pay \$2.6 billion. By fiscal year 2010 that number will have grown to \$4 billion. Medicaid costs are rising so fast we're paying 10 percent more each year. In fact, in the last 3 years our Medicaid costs have increased by \$2.1 billion. And the cost of employee health insurance is also growing. Each year it costs 11 percent more to provide insurance for state employees, even though over the last couple of years the number of employees has declined dramatically. Unless we reform the way we fund our pensions, bring better efficiency to Medicaid, contain the cost of employee health insurance and find ways to continue to reduce the size and sprawl of government, we will never eliminate the structural deficit that takes money away from education, from health care, from law enforcement, from parks and from everything else we care about. Some say these budget challenges are so daunting that the only way out is to

STATE OF ILLINOIS

raise taxes. A tax increase, they argue, could bring in billions of dollars in revenue and solve all of our problems. But I believe that would be a mistake. It would hurt the economy, cost us jobs, and punish the people. But let's take a second and assume for the sake of argument, that we listen to those who want to raise taxes. Let's assume we took their advice. Even if we did, but then did nothing to control the cost of pensions, the cost of Medicaid and the cost of employee health insurance, in a few years we'd find ourselves right back in the same place we're in today. And then what do you do? Raise taxes again? Ladies and Gentlemen, the only way to solve this problem is through structural reform. Reform that helps us both in the short run and in the long run. This year, we face a \$1.1 billion budget deficit. 160 million of that amount comes from increased costs for employee health care, 470 million comes from increased pension costs, another 450 million comes from increased Medicaid costs. Outside of those three areas, our spending matches our revenues. Now, some in the media have estimated the deficit to be around \$2 billion, but you can't believe everything you read. The figure, \$2 billion, is inaccurate because the \$2 billion estimate doesn't include 450 million in federal reimbursement for Medicaid, nor does it include revenue growth of \$500 million which comes from an upswing in the economy. And while a \$1.1 billion deficit is a major improvement from the \$5 billion deficit we faced just 2 years ago, it's still not where we want to be. Illinois

STATE OF ILLINOIS
94th GENERAL ASSEMBLY
HOUSE OF REPRESENTATIVES
TRANSCRIPTION DEBATE

15th Legislative Day

has the largest unfunded pension liability of any state in the nation. What we owe in pension benefits far outstrips the assets we have to pay for those benefits. As a result, every year, we have to dedicate more and more money from the General Revenue Fund just to cover the cost of our pension contributions. In 1970, the Illinois Constitution guaranteed pension benefits for existing employees. But despite that constitutional guarantee, in every one of the last 35 years, the state has almost never paid everything it was supposed to pay. And while pension contributions lagged, laws were passed, time and time again, that actually sweetened some of these pensions even though the state wasn't even making the contributions it already owed. Let me describe this in another way. Imagine you have a credit card. Every month, you keep using that card, but you're not always paying the balance that you owe. In fact, sometimes, you might even skip a payment or two, but you keep using that card to buy new things. So what happens? The principal goes up, the interest rate goes up and the monthly minimum goes up. Just paying the monthly minimum takes away the money you need to pay the rent, pay for groceries, for clothes and for everything else. Now, imagine doing this for 35 years. For the average family, that would be a surefire recipe for personal bankruptcy. But unfortunately, it's exactly what the State of Illinois has been doing, year in and year out. In 1995, the Legislature tried to solve the problem by passing legislation that would strengthen pension funding, but it

STATE OF ILLINOIS
94th GENERAL ASSEMBLY
HOUSE OF REPRESENTATIVES
TRANSCRIPTION DEBATE

15th Legislative Day

2/16/2005

didn't work. And after the pension systems lost over \$6 billion on investments, and after \$6 billion in new, unfunded pension benefits passed in the last 10 years alone, the situation got even worse. In fact, it got a lot worse. In the spring of 2002, Governor Ryan presented an early retirement package. The Legislature was told that the cost of the pension benefits would be about \$600 million. But as it turns out, the real cost to taxpayers was \$2.5 billion, nearly \$2 billion more in pension benefits than what you were led to believe. That one mistake will take \$280 million out of the Rev... General Revenue Fund this year, next year, and every year for the next 10 years. That's money that could have been spent to send 88 thousand kids to preschool. In 1995, our state's pension debt stood at \$19 billion. By the time I took office in 2003, just 8 years later, that number had grown to \$43 billion. At this rate, if we do nothing to stem the tide, by the time we're done paying our entire pension debt we will have paid an earth shattering \$521 billion, including \$220 billion in interest alone. That's \$521 billion not to our schools, not to our hospitals, not to the people in the form of property tax relief. But \$521 billion just to pay the pensions. Now let me be clear, this isn't just a problem that we should address. This is a crisis we must solve and we'd better solve it now. And we'd better solve it now. Last year, we put together a bipartisan commission of Legislators and leaders from business and labor to study the issue of pension reform.

STATE OF ILLINOIS
94th GENERAL ASSEMBLY
HOUSE OF REPRESENTATIVES
TRANSCRIPTION DEBATE

15th Legislative Day

The pension reform plan I'm about to propose comes in large part from their recommendations. I'd like to thank the members of the commission for their hard work. I wanna thank Chairman Roland Burriss and all the members of the pension commission for their efforts in addressing this very serious and complicated problem. Now, our proposal does not completely mirror the recommendations of the pension commission. In some areas, I felt that some of their ideas went too far and placed too much risk and not enough reward on the working people, the men and women who work for our state. But make no mistake about it, the pension commission is right. We have to change and reform the way our pension systems work. The ideas I'm about to propose can save our pension systems over \$100 billion over the next 40 years. And by reducing the cost of our overall pension obligation, we will reduce the state's cost by 55 billion. It means we can save \$750 million this year alone and even more in recurring savings every year going forward. In the State of Illinois, there are five retirement systems. The members of each of these systems receive the an... an annual interest rate of 6 percent on their contributions. That interest rate is the same for every retirement system except for one. Some members of the State University Retirement System receive an average interest rate of 9 percent, regardless of how their investments actually perform. If we bring their interest rate in line with the other interest rates... the other interest rates in the retirement system, we could save \$10

94th GENERAL ASSEMBLY
HOUSE OF REPRESENTATIVES

15th Legislative Day

billion over the next 40 years. Thank you. We also allow some SURS members to take advantage of a little known option where their pension contributions are matched at an unusually high rate. No one in the other pension systems enjoys this perk. If we treated everyone the same, we could save another \$2.5 billion over the next 40 years. Here's another practice that I believe needs reform. Under the current system, school districts sometimes give teachers, professors, school administrators large salary increases in the final years of their career. The problem is that pension benefits for teachers and professors and school administrators are based on the salary they earn in their final 4 years of work. So when they receive large salary increases at the end of their careers, it's the state that ends up paying a lot more money in pension benefits than it otherwise would. Now, I believe... I believe teachers are underpaid and under-appreciated. But rather than back-loading salaries as they're about to leave the profession, wouldn't it be better to pay them more money throughout their careers? If a local school district or a university wants to award big end-of-career raises, they still can. But if they do, they should be the ones to pay the costs. Taxpayers across Illinois... taxpayers across Illinois shouldn't have to pay billions of dollars more in increased pension costs just to cover those end-of-career raises. Capping end-of-career raises at 3 percent per year for purposes of determining the state's share of pension benefits only, would save \$17 billion over the next 40

STATE OF ILLINOIS
94th GENERAL ASSEMBLY
HOUSE OF REPRESENTATIVES
TRANSCRIPTION DEBATE

15th Legislative Day

2/16/2005

years. Here's another reform that will save the taxpayers a lot of money. There's a formula that sets pension benefits. It's based on how many years you work in the state... how many years you work in State Government and how much money you earn. Seventy years ago, it was decided that for police officers in the line of duty because of the hazards associated with their jobs and because they do not receive Social Security, they would receive an additional benefit. It's not hard to understand why. But over the years, that additional benefit was given to a whole new series of state employees, so much so that in fact today, one third... more than one third of state employees now receive these additional benefits. Every time the state adds a new class of employees to this category, it costs the taxpayers more money. So I'm proposing that for new hires other than police officers, we return to the original intent of the law. Any employee who has this benefit would keep it. But going forward, this benefit should go where it was intended to go. Doing that can save \$1.5 billion over 40 years. Most retirement plans start paying full benefits at the age of 65. That includes Social Security. In Illinois, we start paying benefits at the age of 60 if you've worked for the state for 8 years. If you've worked for the state for 30 years, you can retire at the age of 55 and start receiving full benefits. Under our proposal, for new employees only, if you've worked for the state for 35 years, you would start receiving full benefits at the age of 60. And if you've worked for the state for at least 8

STATE OF ILLINOIS
94th GENERAL ASSEMBLY
HOUSE OF REPRESENTATIVES
TRANSCRIPTION DEBATE

15th Legislative Day

2/16/2005

years, you would start receiving benefits at the age of 65. Doing this can save the State of Illinois \$5.5 billion over the next 40 years. And finally, we can save \$19 billion by making a single change. Right now, all state retirees receive an automatic 3 percent increase on their pension that's compounded every year. It doesn't matter how the market performs or how much the cost of living actually is. The number isn't tied to anything and it's one of the major reasons why our pension costs are so out of control. A fairer, more prudent and more fiscally responsible approach is to tie the annual cost-of-living increase to a formula based on the Consumer Price Index. Now, there are some who would argue that this new law should apply to all employees who currently work for the state. This, of course, would save the state even more money. But I have a different view. If you took a job in State Government expecting... expecting that you would receive this benefit, then you should receive this benefit. That's part of the deal you signed on for. But moving forward for new hires, that's a different story. There's no reason to continue a practice that's driving our pension systems to the brink of bankruptcy. For new state employees, when they retire and start receiving their pensions, I propose that their annual increase should better reflect what the cost-of-living actually is. Seventeen states already use the model we're proposing today. This approach is fair to the employee, fair to the taxpayers and it will save us \$19 billion. The final pension reform I'm proposing is very simple. In the

STATE OF ILLINOIS
94th GENERAL ASSEMBLY
HOUSE OF REPRESENTATIVES
TRANSCRIPTION DEBATE

15th Legislative Day

2/16/2005

future, we should stop awarding new pension benefits without a dedicated way to pay for them. This is a structural reform as basic as the concept that when you want to buy something, you make sure you've got the money to pay for it. Adopting this reform will keep us from finding ourselves in the same place we're in now. The pension problems we face are not unique to Illinois. Other states around the country are dealing with these problems too. And a lot of other states are dealing with them in ways that are different from what I propose we do. Take California for example, Governor Schwarzenegger is proposing that state employees switch to a system called 'defined contribution'. Under 'defined contribution', pension benefits are placed in a 401(k) plan and are linked to how the market performs. So if the market does well, naturally, your benefits will grow. But if the market tanks, you're out of luck. Now I'm a big fan of Arnold Schwarzenegger. I admire a lot of what he's doing in California. He's a champion of reform in a state that historically has been on the cutting edge of progressive change in American history. I like a lot of his proposals. But I don't agree with this proposal to switch everyone to a 'defined contribution' system. I don't think it would be wise to force state employees and retirees to rely solely on the performance of the market for their retirement benefits. It's too risky. Pensions are about security. We should invest them carefully and conservatively. Thank you. I know there are some people who are going to make a

STATE OF ILLINOIS
94th GENERAL ASSEMBLY
HOUSE OF REPRESENTATIVES
TRANSCRIPTION DEBATE

15th Legislative Day

2/16/2005

strong push to move Illinois to a 'defined contribution' system, others, like the pension commission, argue that state employees should pay more towards their pension benefits and still others argue we should raise the retirement age for all... raise the retirement age for all state employees to 65, just like Social Security. On the other hand, there are those who would rather not see any changes to our pension systems at all. They want to keep things the way they are. But maintaining the status quo and being afraid to tackle this issue mote... won't make this problem go away. It will only make it worse. If we don't deal with the problem now, when the state finally does deal with it, the solutions will be far less reasonable than the changes we're proposing today. We look forward to sitting down with our friends in labor over the coming weeks and months to try to work and solve this problem. Because this problem has to be solved. I believe the proposals I've outlined today are fair. I believe they're reasonable and I believe they're responsible. They are designed to link benefits to present day reality. These changes are necessary to avert a looming crisis. And they are far preferable to watching the state one day go broke as we struggle and fail to pay our pension contributions. I'm asking you to join me in making these changes. However, making the structural changes our system needs requires more than just reforming our pensions. Each year, Medicaid costs increase by nearly 10 percent. They increase because the cost of providing health care to people who need it

STATE OF ILLINOIS
94th GENERAL ASSEMBLY
HOUSE OF REPRESENTATIVES
TRANSCRIPTION DEBATE

15th Legislative Day

2/16/2005

keeps going up. I believe that health care is a right. Making health care available and affordable to as many people as we can has been a priority of my administration. And when it comes to providing health care to more people, Illinois has advanced, while other states have retreated. I want Illinois to keep advancing. But doing that... but doing that is going to be increasingly difficult if we don't reign in the cost of delivering health care services through Medicaid. The cost of Medicaid is so great that some states are dealing with their budget problems by actually kicking people off of health care. This year, 15 states have been forced to take away health care from people in order to balance their budgets. I have an older brother who lives in Tennessee. And in his state, more than 300 thousand people now run the risk of losing the health care they have. They actually could lose that health care if some of the proposals in Tennessee happen. We must not... we must not let that happen here. But as we invest more money and give more people access to health care, we have to find ways to make providing health care less expensive. One way to save money is to reform the Medicaid system. If we do things like treat Medicaid patients more like we treat people with private health insurance, work with doctors to prescribe more generic medicines and keep hospital payments at current levels, we can provide health care to the same number of people and save money for the taxpayers. We can also save money by taking advantage of the new federal prescription drug

STATE OF ILLINOIS
94th GENERAL ASSEMBLY
HOUSE OF REPRESENTATIVES
TRANSCRIPTION DEBATE

15th Legislative Day

2/16/2005

benefit. Last year, the Federal Government passed a new Medicare prescription drug law. Some states are switching their entire prescription drug coverage for seniors under their Medicaid program to the new federal program. This means the Federal Government assumes their costs which, of course, helps states with their budget problems. But the problem with that approach is that under the new Federal Medicare Prescription Drug Program, too many senior citizens fall through the cracks. It would be foolish... it would be foolish not to let the Federal Government pay for medicine they now cover. That will save us a lot of money. But at the same time, we can't let the gaps in the federal program impact our senior citizens here in Illinois. So I say, we must leave no senior behind. And leaving no senior behind means providing a safety net. Under the federal program, if there is an increase in out-of-pocket spending for seniors, the State of Illinois will make up the difference. By protecting our seniors from the shortfalls in the federal program, senior citizens in Illinois will face the same problems... senior citizens in Illinois will not face the safe... safe problem... same problems as senior citizens in other states. And the good news is, even with this safety net, the State of Illinois will save \$26 million in this year's budget and more than \$50 million next year. Medicaid isn't the only area where health insurance has become a skyrocketing cost. The third obstacle standing in the way of fiscal stability is the high cost of employee health insurance. Over the last 4

STATE OF ILLINOIS
94th GENERAL ASSEMBLY
HOUSE OF REPRESENTATIVES
TRANSCRIPTION DEBATE

15th Legislative Day

2/16/2005

years, the cost of providing health insurance for state employees has grown by 11 percent each year. Now, here's a perplexing fact. When a state employee visits the doctor or a hospital, he or she is actually charged an average of 45 percent more for the same treatment as an employee from the private sector. Now, how can that be? There are more than 59 thousand state employees who, from time to time, visit doctors or may need to be treated in hospitals. We're good customers. And there's a lot of us. Why are state employees being charged more than employees from the private sector? I'm directing the Department of Public Aid to get the State of Illinois a better deal. Go back to the bargaining table and get us a payment rate that's more in line with what everyone else pays. Doing this could save the State of Illinois up to \$45 million each year. I'm not only directing Public Aid to get us a better deal, we're going even further. We are consolidating all health care purchasing by the state, whether it's for Medicaid, for Corrections, employee health insurance, or anything else, into the Department of Public Aid. By doing this... by doing this we can make sure that we're using all of our buying power, whether we're negotiating with insurers, hospitals, or drug companies, to save money and give people better health care. We can save... we can save another \$15 million a year if we help retirees take advantage of the new federal prescription drug benefit. The retirees will still have the benefit that they need from the state but there's no reason for us to pay for something the Federal

Government already pays for. The reforms I just outlined, from pensions to Medicaid to employee health insurance are important and they will help us save over \$900 million. They will help us balance our budget this year and give us the opportunity to keep moving our state forward. But they're even more important because if we don't make these changes, we face a long-term fiscal catastrophe that will cripple our state and jeopardize our futures. This year's budget offers an opportunity to bring long-term fiscal stability to Illinois. The first 2 years of my administration focused on getting our arms around an unprecedented fiscal crisis and doing it in a way that moved Illinois forward and didn't raise taxes on the people. We did it by taking all of the steps we could to quickly reduce the size of government. We reduced the size of the workforce. We cut spending. We consolidated functions and agencies. We renegotiated contracts. We eliminated unnecessary office space. We reduced the size of the fleet. We centralized purchasing. We've taken as many steps as we could because in every place we can we are trying to run government more like a business. And after doing all of that, we are now in a position to go even further in bringing structural change by taking on the cost of pensions, the cost of Medicaid, the cost of employee health insurance and by continuing to adopt new practices that will lead to a more efficient and effective government. I think there are four ways we can make government more efficient: make sure we don't spend money

STATE OF ILLINOIS
94th GENERAL ASSEMBLY
HOUSE OF REPRESENTATIVES
TRANSCRIPTION DEBATE

15th Legislative Day

2/16/2005

we don't have, consolidate our assets into one place, question... question whether we need to do everything we currently do and discontinue the practice of the unexamined spending of taxpayer money. Now, there are... now, there are a lot of people who think more revenue would solve all of our problems. Revenue in this fiscal year will be more than \$25 billion. I'll be the first one to tell ya, I wouldn't mind havin' a little extra money lying around. But our real problem isn't the lack of revenue. It's the uncontrolled growth of spending in areas of government that have literally taken on a life of their own. It's that kind of uncontrolled spending is what runs up deficits. And one way... one way to control spending is to adopt a system of pay-as-you-go. The idea is really very simple. If any of us... any of us propose new spending, whether it's the Governor, Members of the Legislature, Constitutional Officers or anyone else, we should identify how we are going to pay for it. Is there a dedicated revenue source? Is there a corresponding spending cut? Where is the money going to come from? What are we going to do to make sure the numbers all add up, so the red ink stays dry? Nine other states already do this. It's what most families do when they balance their own checkbooks. And it's too bad we didn't have a rule in... a rule like this in place when all of the pension sweeteners were granted. Because if it had been in place, our pension problems wouldn't be nearly as bad as they are now. We should all want to hold the line on unnecessary and unaffordable spending. Adopting a

pay-as-you-go system is the responsible way for our government to operate. And it's the responsible way to treat the taxpayers' money. Another way to be responsible with taxpayers' money is to look at the major costs we face each year and try to find long-term solutions to contain them. One example is the cost of crime. Every time a crime is committed, the people of Illinois pay in a number of different ways. From the terrible human cost placed on victims and their families, to higher prison costs, to higher law enforcement costs, to the deterrent effect crime has on the economy. Right now, nearly 55 percent of prisoners end up right back in the prison system. This year, 42 thousand inmates will be released from prison and unless we do something, more than half will be right back in the system within 3 years. We spend \$21 thousand each year to house an adult inmate in our prison system. At that rate, the returning 20 thousand-plus prisoners, the statistics tell us the state is about to get reacquainted with, will cost us \$420 million each year. But far worse than that, in between prisons stays, they're out there committing more crimes and hurting more people. One of the best ways to fight crime is to keep people from committing crimes. In 2004... in 2004 we reopened the Sheridan Correctional Center as a national model drug treatment prison; 950 prisoners are receiving drug treatment and job training that they would not otherwise receive. So far... so far, the results are promising. It's still early, but the rate of recidivism is down 55 percent. We need to try to

STATE OF ILLINOIS
94th GENERAL ASSEMBLY
HOUSE OF REPRESENTATIVES
TRANSCRIPTION DEBATE

15th Legislative Day

2/16/2005

replicate that success throughout the entire prison system. That's why I'm convening a group of civic leaders and elected officials from across Illinois to look at the prison system and develop ways to reduce recidivism. It could take the form of increased educational opportunities, like getting a GED. It could take the form of providing more job training and there are other ideas as well. We've spoken with a number of people who are interested in participating. They come from a broad spectrum, ranging from the Reverend Jesse Jackson to state's attorney Kevin Lyons from Peoria. I'm sure there are many in this chamber who'd be interested in working with us on this issue. We are interested in working with you and we would like to start this afternoon. So, if you're interested, come to our office and let us know. We are eager to start working on this right away. In order to build... in order to build on our success of reducing the size of government and saving the taxpayers money, we need to keep asking questions. For example, do we really need as many state agencies as we have right now? We've already seen the benefits of consolidation: fewer administrative costs, greater efficiency, better coordination, all helping to save taxpayers money. So far, we've consolidated nearly 20 state agencies and departments, but I think we can do even more. So, I'm going to ask our working group to look at how many agencies we need and see how much further we might be able to go. And speaking of consolidation, consolidating functions within State Government to bring

HOUSE OF REPRESENTATIVES
TRANSCRIPTION DEBATE

15th Legislative Day

greater efficiencies shouldn't stop with state agencies. We are one state, one government, and yet we have 650 special purpose funds. Special purpose funds are created to help a special purpose and their intent is good. The problem is they serve limited interests not the broad public interests. Right now, they exist with a collective surplus and each year, many of them generate new surplus revenue. That's money we could invest in our schools. I propose we pool the balance of the special purpose funds and use whatever the funds don't need to help our schools. Each special purpose fund would perform the exact same functions it does now. Each fund would have the same name and same purpose and each fund would have the same money it needs plus a reserve of extra money, just in case. I propose we create the School Endowment Fund and invest 420 million of the funds' surplus balance in it. Every year for the next 3 years, we will have \$140 million in new, recurring revenue that we can count on for schools. And after 3 years, a new surplus balance will have built up and that money can go to education as well. By doing this, we're creating a new, recurring source of revenue for our schools. And I propose that, for the first time ever, we dedicate recurring revenue to early childhood education. I think they work for us. Now, our proposal would not apply to funds like the Road Fund, Bond Funds, Pension Funds and others. Using the existing, unneeded balances of the special purpose funds, however, is a way to use our existing resources... our existing resources to help our

schools. Now, I know it took decades to create all of these funds. I know each fund has its supporters and that some will not want to see the surplus go to education. But in tough times, you have to set priorities and our priority is education. And while we're on the topic, I'd like to say a few words about school funding. I'm proud to say that in the last 2 years we've given our schools a lot more money. In fact, over the last 2 years with your help... in fact, over the last 2 years of my administration, we've invested \$1.1 billion in new school funding. We've invested more money in education in these last 2 years, despite historic budget deficits, than my predecessor did in the first 2 years of his term despite a booming economy and more money than his predecessor did while... during his first 5 years he was in office. And year after year, we've been fighting for education funding. Education spending under my administration, if we're successful in this budget, will have increased by more than \$2 billion from when I first took office. Before we started investing more money in our schools, almost 80 percent of school districts operated in deficit spending. Just 1 year later, with the help of our investments, the number of school districts operating in deficit spending fell to 45 percent. That's an incredible change in just 1 year. Now, I oppose raising the income tax. I support investing more money in our schools. We've increased school funding by making education our number one spending priority. We squeezed the system as much as we could. We made cuts elsewhere,

STATE OF ILLINOIS
94th GENERAL ASSEMBLY
HOUSE OF REPRESENTATIVES
TRANSCRIPTION DEBATE

15th Legislative Day

2/16/2005

cuts that were not easy to make, but we made them because the money we spend on children is the best money we can spend. Many of you here support raising the income tax to provide more funding for schools. I applaud your commitment to the school children of our state. I respect your view. I respect your work and I agree with you that there's an over reliance on property taxes to fund schools. The state should... the state should pay a larger share and that's why we've been investing more money in the foundation level in the 2 years I've been Governor. But keep in mind, any proposal that swaps income taxes and property taxes still wouldn't mean more total funding for schools unless taxes go up more than they go down. That approach puts the hard choices right back on the taxpayers. It makes them choose between putting away money for college or paying the mortgage. It makes them choose between buying new clothing for their children or putting more savings away for their retirement. State Government may be having tough financial times and yes, some school districts may be having tough financial times, but many of the working families of Illinois have experienced tough financial times too. They've been making hard choices. We signed up for our jobs to make sure their hard choices don't get any harder. I know that, if we don't raise income taxes and sales taxes, we will have to make more difficult decisions but then again, that's what we're supposed to do. If we stay the course and keep making the tough choices, we can continue to help our schools without

placing the burden on the people we serve. We need to pass a capital Bill. We need.. we need to build more roads, we need to build more schools, more facilities for our universities and we need to help the CTA and mass transit all across Illinois. We can do all of that. We can build roads. Build schools. Put people to work. We can create opportunity all around Illinois, in southern Illinois, in central Illinois, in Rockford and Rock Island. A capital Bill will help us do that. It will help us do things like construct the Technology Boulevard in Peoria and improve the Peoria Port District. Develop projects like the EIGER Lab in Rockford and the Rockford Airport. Projects like the Fifth Street Road Extension in Lincoln and the Illinois 173 Interchange in Machesney Park. Projects like Illinois Route 2 in Rockford and the new Western Illinois University-Quad Cities Campus. Projects... Ya liked that, huh, Representative Verschoore? We need a capital Bill to build more roads, help our universities, and we need a capital billed so... Bill so we can build more schools. A recent report from the Capital Development Board says our schools need more than \$6 billion in new construction. Some schools have more kids than they have space. Other schools are so old, they're crumbling. And we need a capital Bill to clean up our environment. We owe it to ourselves... we owe it to ourselves and we owe it to our children. That's why I support earmarking 10 percent of any capital Bill you authorize for projects that help the environment. Projects like cleaning up contaminated sites at Lake Calumet, reducing emissions from school buses in Rockford, improving water quality across the state through the Conservation Reserve Enhancement Program or extending the Brownfield Program in areas like Aurora, South Cook County, and the Quad Cities. However, none of this is possible... none of this is possible without a dedicated revenue source to pay for it. That's the responsible way to fund construction. And here's how we can pay for it. There's no single act that causes more damage, more destruction, and more health care costs than smoking. If we raise the cigarette tax by 75 cents and raise the tax on cigars, we can generate over \$150 million each year in revenue. We can use that money to pay the debt service on a capital Bill. We can also use a portion of that money to provide health care to people who need it in the form of KidCare and FamilyCare. Raising the cigarette tax will help us provide more health care to

people who need it. I wanna help the CTA. I hope you do too. I wanna help the CTA avoid service cuts and I'm for helping mass transit across Illinois. In this budget, I propose that we close two loopholes. One would help the CTA and mass transit; the other would help restore cuts at the Department of Natural Resources. Now, when it comes to mass transit, everyone here has an interest. If you're from Chicago, you probably wanna help the CTA avoid service cuts. If you're from downstate, you want more mass transit options. If you're from the suburbs, you wanna protect mass transit funding. But we can't spend money we don't have. That's why I propose we close the canned software loophole and use that money for mass transit. The canned software loophole... the canned software loophole differs from every other loophole or tax incentive on the books because in this case we're competing against ourselves. Illinois is the only state in the nation... the only state in the nation with the canned software loophole. In Illinois, there are a handful of big corporations who don't pay sales tax on the computer software they buy. Individuals do and so do the 650 thousand small businesses across our state. Giving a tax break like that to a handful of big companies with big connections puts 99 percent of businesses in Illinois at a competitive disadvantage. This is a special interest loophole. It's unfair to the working people of our state and it's unfair to the small businesses of our state. We should close that loophole and use the money to help the CTA and help mass transit across Illinois. We

also need revenue to fund more conservation programs. I support a recommendation from Lieutenant Governor Pat Quinn to close the tax loophole on landfill gas. If we close this loophole, we could use the revenue to fund conservation programs and restore some of the reductions at the Department of Natural Resources. So if you're serious about restoring funding to DNR, here's a way to do it that's fair and makes sense. Now, I've proposed a number of far-ranging reforms today; pension reform, Medicaid reform, employee health insurance reform and spending reform. In total, they represent a roadmap to fiscal solvency. They represent a way to make sure we stop spending money we don't have, stop paying for things we can't afford and start setting the right priorities that put the taxpayers first. If we embrace this plan, we can meet our obligations to state employees and people who need health care and we can end the cycle of structural deficits without forcing the hardworking people of our state to pay more in taxes. And if we embrace this plan, we can give the people of Illinois a budget they can believe in. A little while ago, I asked you to pass the Pay-As-You-Go Act. So let me practice what I preach and sum up for you how our budget for fiscal year 2006 works and how we pay for it. Our pension, Medicaid and employee health insurance reforms would save over \$900 million this year. Our reforms would save the pension systems more than \$100 billion over 40 years. The 900 million in savings, along with spending cuts at Central Management Services, better

tax enforcement and more federal revenues would be used to eliminate the deficit. We can provide \$140 million for schools each year by using the unneeded surplus balance sitting in our special purpose funds. We can build roads and schools, clean the environment and provide health care for 56 thousand more men and women and children by raising the tax on cigarettes and cigars. We can provide new funding for mass transit and bail out the CTA by closing the canned software loophole. We can increase funding for conservation and restore cuts to the Department of Natural Resources by closing a loophole on landfill gas. And we can do all of this: balance the budget, eliminate the deficit, invest more in schools, provide health care to people who need it, build roads, build schools, clean the environment and fund mass transit. All of this without raising fees, without raising the corporate income tax, without raising the personal income tax and without raising the sales tax. That has been the philosophy behind each of our budgets. Five simple points: don't raise the income tax, don't raise the sales tax, invest more in schools, invest more in health care and reduce the size and cost of government through major structural reform. By working together, we've been able to achieve just that. We've changed priorities and reformed the way government operates. And now we find ourselves at a seminal moment. It's time to choose. Do we continue to conti... to shake up the system and bring fundamental change to State Government or do we allow ourselves to slide back into the old ways of

waste, inefficiency and misplaced priorities? I want us to keep moving forward. The progress we've made over the last 2 years couldn't have happened without you. Sullivan: "Well, the legislation is pretty straightforward. We have passed certain amount of legislation, racial profiling and certain things in regards to death penalty legislation. We feel, and this is an initiative by the police... Chiefs of Police Association, that some of the smaller communities should receive training to understand the laws that we're passing. So, it's geared toward some of the smaller communities. The training itself could be satisfied in many ways. One of which is going to the Chiefs Association Convention. We also have what's called the Mobile Training Unit that does types of training in the communities where they... where it is needed. So, there's many different ways that they can receive the training. But any training has to be authorized by the Law Enforcement Training and Standing (sic-Standard) Board."

McCarthy: "Now, you... you say this... is mainly for the smaller cities but the only city that is exempt from it is Chicago? Is that correct?"

Sullivan: "Yes, it is."

McCarthy: "So, that one police chief doesn't have to go for any of the training but all the rest do. And you said smaller, like my communities that are over 50 thousand, would those police chiefs be expected to go for the 20 hours every year?"

Sullivan: "Presently, we have... the Sheriffs' Association... all the sheriffs have to go through this 20 hours of mandatory training too. This would just put them in par with the Sheriffs' Association."

McCarthy: "Now, I see, according to our analysis, the City of Chicago supports this legislation as long as they're exempted out of it. Is that correct?"

Sullivan: "They... they are neutral on it, actually. But right now, the City of Chicago doubles the amount of training that they require. So, this really does not affect them. They're already ahead of the curve when it comes to what their chiefs need to be trained on. The only problem that the chi... the city had early on was that they also have superintendents an... and deputy superintendents. This legislation didn't really... didn't necessarily discuss the superintendents and deputy superintendents. So, we just thought... the focus really is not the larger sections because they are already ahead of the curve in this. The focus is gonna be on the smaller jurisdictions that really need the training to be up to par on... on some of the legislation that is vital for... for an effective law enforcement agency."

McCarthy: "And... and if a local jurisdiction is already doing a certain amount of training on its own, can it apply to the board to say, rather than us go to Springfield or wherever it's assigned to go, do they... do they have to go this one?"

McCarthy: "Okay. And the last thing is, are the opponents that we have listed here like the Municipal League and DuPage Mayors and Managers, the City of Naperville and the Northwest Municipal Conference, are they still opponents? As far as you know?"

Sullivan: "At... at this point... in... in my discussions with them and we've had plenty of discussions over the last few weeks in regard to this legislation. They understand the concept. They understand that we have to have our chiefs understand the law. I mean there's certain amount of responsibility that if they don't know the law, they can get caught in certain types of lawsuits that happen on an everyday basis. They are still somewhat opposed to this because we are asking them to fund this. But as I said before there is a remedy that is very cost effective for them and that is this mobile training unit. The mobile training unit, and there are 16 throughout the State of Illinois, can go into community and all the people from a certain geographic area can receive training at very limited cost. This is a free service on most cases. All's they would have to do is pay for the transportation and

And I... and I know that the police chiefs that service the area of my district are well aware of the new legislation that comes through the General Assembly. They're well aware of the training needed to implement that legislation within their departments. And I reluctantly think that this is overkill. I think that responsible police chiefs are already doing it. And I kinda see it as saying that we know do... doing their job better than they do. I do look forward to hearing from my... good friend, Representative Millner, though, for the police chief's role. And I see him going to his microphone. Thank you."

Sullivan: "Thank you."

Speaker Hannig: "The Gentleman from DuPage, Representative Millner."

This won't be an unfunded mandate because most police departments throughout the State of Illinois are covered under the mobile tre... mobile teams that are out there. Sullivan: "This certainly is a cost that the municipalities are gonna have to bear."

Moffitt: "That the municipality would have to bear?"

Sullivan: "Yes, it is."

Moffitt: "And is there a penalty? Suppose it's a small department and especially the small ones perhaps, it's only one... one full-time person or maybe not even a full-time person, just one... kinda a very small department in some of our small rural communities. Is there a penalty? Suppose they can never find the time to get the training? What will... what will happen in that case?"

be up to speed on the many pieces of legislation that we... that we do pass. I... Let's say that this law does pass and beco... or this Bill does pass and becomes law. What would happen if a small jurisdiction didn't take the training and something tragically happened where they didn't follow the law and then were sued? That could enter into a lawsuit where they would say, well, wait a second, you had the opportunity to receive training, you goofed up and now we're in this position. So, I... just... I'm concerned... I have a lot of small departments. The problem with them finding time to get away and, ya know, that's... that's my concern. So, I... I mean..."

Sullivan: "Yes."

Moffitt: "...in terms of intent, I... I totally agree."

Sullivan: "We are working with the... Chiefs of Police Association to acquire Homeland Security grants. There is an awful a lot of money out there in regard to Homeland Security grants that are gonna help offset the cost of this. The Chiefs of Police Association realizes that this is a good piece of legislation to bring their communities... their chiefs in... in these smaller communities up to speed on legislation that they need to know. So, they're going to be working to cover the different jurisdictions should they need to go to these... this training. One of your concerns, I remember in committee was, I have a... a one town... or a one-chief town and what happens if they're gone, are they gonna be covered? Well, right now they have to go to court on certain occasions and the sheriffs, police and the State Police will cover that jurisdiction. So... ya know, hopefully, we have tried to, in our best bet, cover some of the concerns that you raised in committee."

Moffitt: "Okay. Your final comment there, are you guaranteeing that training is taken locally then? Is it gonna be brought to the local community or at least the local county?"

Sullivan: "The mobile training unit... there's 16 of them throughout the State of Illinois. They are going to be

going to the jurisdiction... different jurisdictions. So, can I guarantee training within one specific town? I don't know that that's possible. But we can certainly guarantee that they're gonna be in a geographic region that would require a very short commute to go to the training within a county or something of that nature. I think that's gonna reduce the cost to any of these municipalities tremendously. But we have to remember, what are the costs if they don't get the training and something tragic happens. That's really what we need to think about here."

Moffitt: "Thank you, Representative."

Sullivan: "Thank you."

Speaker Hannig: "The Lady from Cook, Representative Monique Davis."

Davis, M.: "Thank you, Mr. Speaker. Will the Sponsor yield?"

Speaker Hannig: "He indicates he'll yield."

Davis, M.: "Representative, I see that your Amendment #1 excluded Chicago."

Sullivan: "Yes, it did."

Davis, M.: "Was that because they are Home Rule?"

Sullivan: "That is certainly one of the reasons. The main reason being that they already take into account training. They double the amount of training for their officers in Cook... in Chicago than what we're trying to require downstate. This Bill is not really geared towards the larger jurisdictions 'cause, as the earlier speaker said, they're already doing this. And so, they're fine, they're covered. We're trying to get some of the smaller

jurisdictions that might not know about the racial profiling Bill..."

Davis, M.: "Okay."

Sullivan: "...and things of that nature."

Davis, M.: "And they... All right. What about... I think I see on your Bill that they can... they may teach ethics and they may not or they may take..."

Sullivan: "We're giving them different options but ethics is certainly one of them."

Davis, M.: "Don't... I just think ethics would be a requirement, ya know. There... there's so many police powers that we're giving in our state. I think ethics is extremely important in police training."

Sullivan: "Absolutely. I couldn't agree with you more."

Davis, M.: "So, I'm... I'm wondering why you would make it an option rather than a requirement."

Sullivan: "Well..."

Davis, M.: "I think a police officer on the street, he needs ethics more so than management. Don't you think? Or executive training?"

Sullivan: "Well, it's hard for me to understand the different jurisdictions throughout the state. You might have one state that has a very good ethics policy, so we wouldn't want to concentrated just on ethics for them 'cause they're already doing that. So, it's better to broaden the scope of what they can get training for to fit their individual needs. Certainly ethics is a... is a very big one and probably one of the top ones we should be concentrating on."

But like I said, maybe one jurisdiction needs work on ethics so they'll go get the ethics training. Maybe another jurisdiction has some power plants and needs some Homeland Security training on what happens if we have a crisis at the power plant. Well, they need a different set of training. So, we don't want to limit it to one. We want to expand the options so an individual town or municipality can tailor the training for what their needs are."

Davis, M.: "I commend you on your legislation, Representative Sullivan."

Sullivan: "Thank you."

Davis, M.: "I believe that some of the crisis that occur, for example, death by laser guns or death by improper holding could perhaps be eliminated with greater training. And because a police officer is trained initially, it does not mean he has learned something improperly and continues to execute part of that training incorrecu... incorrectly. So, I commend you for putting forth legislation that hopefully will correct any bad behavior that is occurring or any incorrect actions that continue to occur. This yearly training will eliminate a number of problems and hopefully, ethics will be a part of that training. Thank you, Representative."

Sullivan: "On your corrections systems?"

Stephens: "Well, in... indirectly... I mean, eventually. Speaking of corrections... did I... was the Governor here earlier? And... and didn't he mention that he was going to hire Jesse Jackson to solve our recidivism problem?"

Sullivan: "I... I believe there is a discussion about recidivism and it... how it can help the corrections institutions throughout the State of Illinois."

Stephens: "That... that lifts my spirit. Now, but I'm a little bit... it's a little bit mellow over that because I understand that just after he hired him then he cut his pension?"

Sullivan: "I'm sorry?"

Stephens: "It just after he hired Jesse Jackson then he cut his pension? Did he announce that in his...?"

Sullivan: "He... he might have, but I'm not aware of that at this point."

Stephens: "Well, I... I just wanted to make sure that... that I understood what was going on and how your Bill was going to affect recidivism in the State of Illinois."

This is a trailer Bill that does three small things: (1) It changes the word 'illegitimate' to 'born out of wedlock'; clarifies that the sibling in the law is the sibling of the child and strikes a portion of the old law that was in conflict with the new, stricter standard for grandparent visitation."

I want to briefly introduce you to or re-familiarize you with an African-American great. His name is Jack Johnson. Long before organized fighting, which today we call boxing, there was prizefighting. For 13 years, Jack Johnson was

the most famous and notorious prizefighter and African American on the earth. He battled his way to the top of... to the top from obscurity, suffered persecution. He had the boxin' title taken away from him by the U.S. Government and spent years of his life in exile. All of these things was takin' place during the lowest point of African-American life after the Emancipation. He was abandoned by the Federal Government and lived under the constant threat of mob violence. African American at the turn of the 20th century were no longer enslaved but not yet truly free. Jack Johnson insisted on being free. While most African Americans struggled to survive, Jack Johnson basked in his riches and fame. He took orders from no white man. He was considered to be a threat to the natural order of things. Jack Johnson, born March 31, 1878, in Galveston, Texas, the year after Reconstruction. He was a self-defined man and a pure man. There were no other like him. Jack Johnson also felt the sting of life, thrown in all classes of society, suffered persecution by his own race and others. He became to know many things other than... in life other than boxing. He was an avid reader, a student of history, an entrepreneur. He worked on inventions. He held a patent for a wrench to fix on cars. He played the ba... the bass fiddle in shows at various hotels he stayed while waiting for his next fight. By February 1902, Jack Johnson had won 27 consecutive fights. By 1908, at the age of 30, Jack Johnson became the first black heavyweight champion in the history of the world. After capturing the Heavyweight

But on House Bill 212, for more than half of that debate, the Sponsor of the Bill, Representative Sullivan, was never on the camera. We never saw the Sponsor, Representative Sullivan, on the video screen on the left side of the... the chamber. That's just part of the worry I have about making a digital video recording of what goes on here because that did not show the Sponsor, did not show House debate, but did focus on a half a dozen Legislators who were either trying to grab a bite of lunch or talk with colleagues. And I don't think that's the intent of... of televising this and I certainly don't think it should be the intent of selling a digital video disk with that kind of material on it."

The Act establishes the procedure for local... locating solid waste facilities, but 'c and d' (sic- construction and demolition debris) facilities are exempt from local siting in counties with a population over 700 thousand according to an agreement reached in 1997. This legislation would maintain the status quo by adding that no permit shall be required for a facility in a county with a population of over 700 thousand as of January 1, 2000. The local siting process is thus maintained for all counties except Cook and DuPage. There's no opposition and I ask for an 'aye' vote."

Granberg: "Sure."

Black: "And I... You've been here long enough to know that's the way we always used to do business. If we were impacting somebody else's district, we certainly made a good faith effort to talk to that Legislator. If... if you say you've done that, then that's fine."

Granberg: "Yes. Representative Black, I did that because I agree with the protocol."

Black: "Right."

Granberg: "What happened when it was inadvertent, three counties come together at this juncture. And we did not know that it was across the county line."

Black: "All right. So, kind of like the four corners monument out in the Southwest."

Granberg: "Right."

Black: "Only this was three corners."

Granberg: "Three corners."

Black: "Okay. Thank you."

Granberg: "Thank you, Representative Black."

Speaker Hannig: "Is there any further discussion? Then the question is, 'Shall House Bill 509 pass?' All in favor vote 'aye'; opposed 'nay'. The voting is open. Have all voted who wish? Have all voted who wish? Have all voted who wish? Representative Brady, Jenisch, Myers, would you like to be recorded? Mr. Clerk, take the record. On this question, there are 115 voting 'yes' and 0 voting 'no'. And this Bill, having received a Constitutional Majority, is hereby declared passed. Mr. Clerk, would you read the House Bill 511."

Clerk Mahoney: "House Bill 511, a Bill for an Act concerning health. Third Reading of this House Bill."

Speaker Hannig: "The Gentleman from Clinton, Representative Granberg."

Granberg: "Thank you, Mr. Speaker, Ladies and Gentlemen of the House. House Bill 511 bans the use of mercury in vaccines administered to pregnant women and to children under three. Numerous studies have been conducted from Baylor University

to the Food and Drug Administration and other universities citing the correlation between the use of mercury in vaccines with pregnant women and young children and the correlation with incidents of autism. This would prohibit the use of mercury in those vaccines. And I'd be happy to answer any questions."

Speaker Hannig: "The Gentleman has moved for passage of House Bill 511. Is there any discussion? The Gentleman from Vermilion, Representative Black."

Black: "Thank you very much, Mr. Speaker. Will the Sponsor yield?"

Speaker Hannig: "He indicates he'll yield."

Black: "Representative, is there anyone in the medical community... I... I see no opposition slips were... were filed. But I want to make sure that there was... was there any testimony that this might inhibit the transmission or the transmittal of vaccines? I... I don't want any delay in flu vaccines or children's immunizations. Evidently, no one indicated that this would create any such problem?"

Granberg: "I spoke with the representative who... of Pfizer, I believe, before this Bill was in committee, Representative Black. And he indicated he had no opposition to it and it should not be a problem with other vaccines."

Black: "Would... would the representative that you talked to was that Dr. Coryell?"

Granberg: "No, in fact, Representative Black, it wasn't Kris... it wasn't Dr. Coryell. It must've been another company. 'Cause I didn't... I had forgotten that Kris represents

Black: "Okay. The person you talked to was actually a representative from a pharmaceutical firm, I take it."

Granberg: "Ye... yes."

Black: "All right."

Granberg: "Yes."

Black: "Representative, would you be willing to amend the Bill on its face? I think we should remove mercury from the table of elements and also change the planet Mercury to some other name. Would that be all right? Last year we abolished mercury thermometers. So, I... I don't know why... why do we keep mercury on the table of elements and the planet Mercury. I... we oughta do away with that."

Granberg: "That's fine with me. I never did well in chemistry."

Black: "I'm trying to think of a way to go after your Bill but I... I can't. So, I guess I'll sit down and vote 'yes'."

Granberg: "Thank you, Representative."
