

AN ACT concerning vaccinations in health facilities.

Be it enacted by the People of the State of Illinois,
represented in the General Assembly:

Section 5. The Life Care Facilities Act is amended by
adding Section 10.1 as follows:

(210 ILCS 40/10.1 new)

Sec. 10.1. Vaccinations.

(a) A facility shall annually administer a vaccination against influenza to each resident, in accordance with the recommendations of the Advisory Committee on Immunization Practices of the Centers for Disease Control and Prevention that are most recent to the time of vaccination, unless the vaccination is medically contraindicated or the resident has refused the vaccine. Influenza vaccinations for all residents age 65 and over shall be completed by November 30 of each year or as soon as practicable if vaccine supplies are not available before November 1. Residents admitted after November 30, during the flu season, and until February 1 shall, as medically appropriate, receive an influenza vaccination prior to or upon admission or as soon as practicable if vaccine supplies are not available at the time of the admission, unless the vaccine is medically contraindicated or the resident has refused the vaccine. In the event that the Advisory Committee on Immunization Practices of the Centers for Disease Control and Prevention determines that dates of administration other than those stated in this Act are optimal to protect the health of residents, the Department is authorized to develop rules to mandate vaccinations at those times rather than the times stated in this Act. A facility shall document in the resident's medical record that an annual vaccination against

influenza was administered, refused or medically contraindicated.

(b) A facility shall provide or arrange for administration of a pneumococcal vaccination to each resident who is age 65 and over, in accordance with the recommendations of the Advisory Committee on Immunization Practices of the Centers for Disease Control and Prevention, who has not received this immunization prior to or upon admission to the facility, unless the resident refuses the offer for vaccination or the vaccination is medically contraindicated. A facility shall document in each resident's medical record that a vaccination against pneumococcal pneumonia was offered and administered, refused, or medically contraindicated.

Section 10. The Nursing Home Care Act is amended by changing Section 2-213 as follows:

(210 ILCS 45/2-213)

Sec. 2-213. Vaccinations.

(a) A facility shall annually administer a vaccination against influenza to each resident, in accordance with the recommendations of the Advisory Committee on Immunization Practices of the Centers for Disease Control and Prevention that are most recent to the time of vaccination, unless the vaccination is medically contraindicated or the resident has refused the vaccine. Influenza vaccinations for all residents age 65 and over shall be completed by November 30 of each year or as soon as practicable if vaccine supplies are not available before November 1. Residents admitted after November 30, during the flu season, and until February 1 shall, as medically appropriate, receive an influenza vaccination prior to or upon admission or as soon as practicable if vaccine supplies are not available at the time

of the admission, unless the vaccine is medically contraindicated or the resident has refused the vaccine. In the event that the Advisory Committee on Immunization Practices of the Centers for Disease Control and Prevention determines that dates of administration other than those stated in this Act are optimal to protect the health of residents, the Department is authorized to develop rules to mandate vaccinations at those times rather than the times stated in this Act. A facility shall document in the resident's medical record that an annual vaccination against influenza was administered, refused or medically contraindicated.

(b) A facility shall provide or arrange for administration of a pneumococcal vaccination to each resident who is age 65 and over, in accordance with the recommendations of the Advisory Committee on Immunization Practices of the Centers for Disease Control and Prevention, who has not received this immunization prior to or upon admission to the facility, unless the resident refuses the offer for vaccination or the vaccination is medically contraindicated. A facility shall document in each resident's medical record that a vaccination against pneumococcal pneumonia was offered and administered, refused, or medically contraindicated. Pneumonia--shots:---Before--a--prospective resident's admission to a facility the facility shall--advise the--prospective resident to consult a physician to determine whether the prospective resident should obtain a--vaccination against pneumococcal pneumonia.
