Pedestrian Stops: Agency Tables

The following section comprises tables summarizing 2019 Illinois pedestrian stop data.

A summary of Illinois statewide pedestrian stops appears first followed by 1) summaries for each agency in alphabetical order, 2) a table listing agencies that reported zero stops, 3) a table listing agencies that reported incomplete data, and 4) a table listing non-compliant agencies.

Each law enforcement agency that provided complete stops data for 2019 was provided an opportunity to review their tables and provide feedback prior to the study team's completion of this final report. The feedback was helpful and has led to some improvements in the report content and the tables, for which the study team is grateful. Some agencies have offered comments on their earlier version of the tables. An agency's comments appear in this document following their statistical tables.

Readers are urged to read *Part I* of this report, the *Executive Summary*, a separate document. *Part I* is a guide to the use of the tables and explains how all the numbers were derived. *Part I* also includes a technical appendix, which may be of interest to those who seek a deeper understanding of the methodology.

Pedestrian 13481 LAKE FOREST POLICE 2019 We are unaware what benchmark the author(s) have chosen here. One reader suggested it was an approximation of our city's population? Perhaps prorated in some way? If so, the author lacks a fundamental understanding of field interviews. Our officers speak with individuals from all over northeastern Illinois and beyond.

Pedestrian 13019 NORTHLAKE POLICE 2019 As in years past, the Northlake Police Department is committed to fair and impartial traffic enforcement. Our officers fully support the purpose of Pedestrian and Traffic Stop Data collection and stand against race profiling. We have pointed out in the past, Northlake has proactively developed a secondary monitoring system to track officer stop activity which is reviewed by line supervisors multiple times a year.

As mentioned in previous years, our City shares borders and several major roadways with jurisdictions some of which have a 90% Estimated Minority Driving Population. We have also noted IDOT has estimated many thousands of vehicles travel through roadways in Northlake on any given day. Because Northlake is a destination for shopping and commerce, drivers from high EMDP communities commute to or through the City of Northlake. We welcome all travelers.

Our police department agrees with IDOT that limitations exists when using purely census driven data. For this year's traffic study, IDOT points out benchmarks have errors. "Boundaries of the cities and counties may not closely fit the actual area of residence of drivers and pedestrians who might be encountered in a specific community". We thank IDOT for acknowledging a city no more than one square mile like Northlake, has a truly diverse driving population on any given day of the week. Holding Northlake to a static census count from over 10 years ago has never provide the full scope of our public interactions. The newer stop data interpretations implemented by IDOT should be very helpful tool for police departments as we move forward to provide fair and impartial policing.

Pedestrian 13100 URBANA POLICE 2019 After consulting with IDOT, state legislators, and other law enforcement agencies, the Urbana Police Department revised data reporting practices to be more in line with the intent of the statute and with other law enforcement agency practices beginning in January 2019.

Furthermore, the Urbana Police Department recognizes the significant methodological difference from previous years' reports in computing and reporting the racial disparity. The results of these calculations are not comparable to previous years' reports issued by the state.
