 - Included updates to most demographic assumptions.
 - Impact on the 2022 valuation
 - Decreased actuarial accrued liability by \$5.3 million
 - Decreased employer normal cost by \$42 thousand
 - Decreased the FY 2024 statutory contribution rate by approximately 2.6% of capped payroll (or about \$250 thousand)
- Under this schedule, an experience review for the period from July 1, 2021 through June 30, 2024, will be performed after completion of the June 30, 2024, actuarial valuation with expected implementation of the recommended assumptions beginning with the June 30, 2025, actuarial valuation.

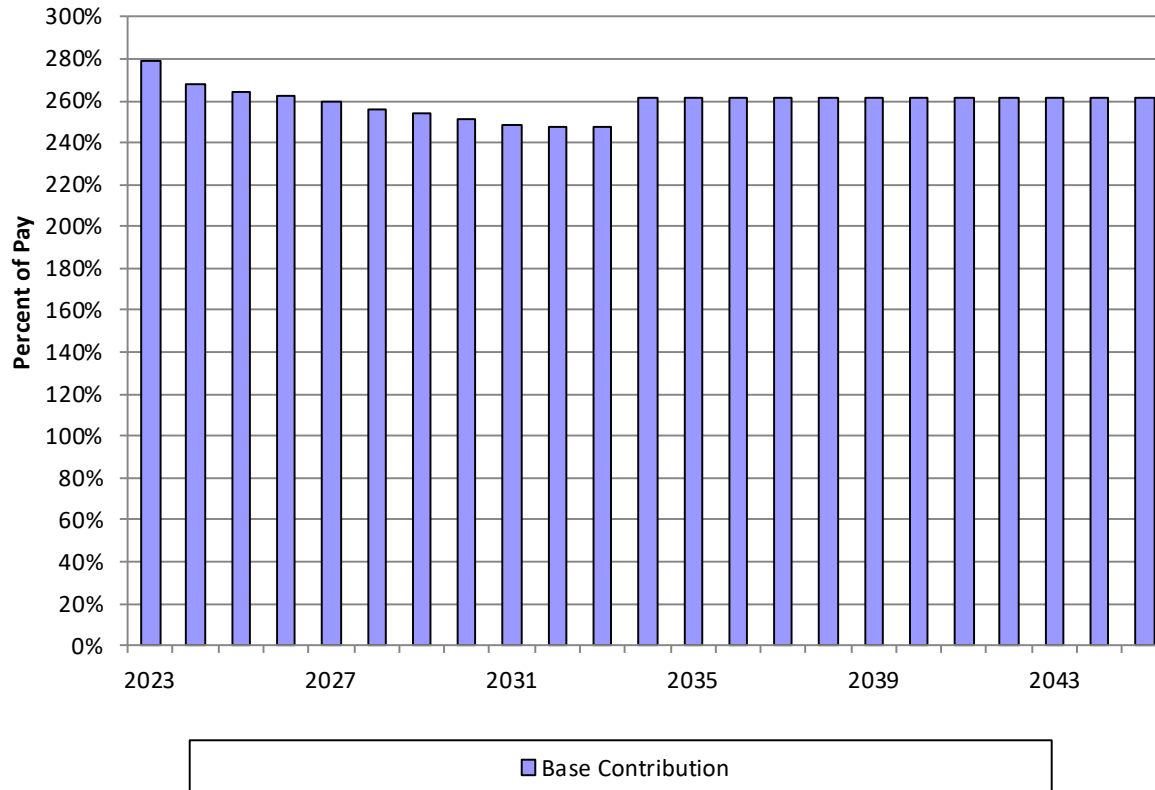

Summary

- Investment and liability gains increased the funded ratio slightly and decreased the State's contribution requirement.
- Funded ratio is projected to increase slowly from 22.0% in 2022 to 31% in 2033, and then increase rapidly to 90% by 2045.
- Updated actuarial assumptions decreased the System's liabilities by 1.4%.
