SERVING MINORITY SENIORS

FY 2019

**A Report to the Governor
and the Illinois General Assembly**

from the
Illinois Department on Aging
Illinois Department of Healthcare and Family Services
Illinois Department of Human Services
Illinois Department of Public Health

as required by Public Act 88-0254

The Honorable JB Pritzker, Governor, and the Honorable Members of the Illinois General Assembly

We are pleased to provide you with the Minority Services Report as required by Public Act 88- 0254. This Act requires that the Department on Aging, the Department of Human Services, the Department of Public Health, and the Department of Healthcare and Family Services cooperate in the development and submission of an annual report on programs and services provided to minority senior citizens.

The report is submitted to meet the above requirement and describes, in detail, the programs and service initiatives directed to, or available to, senior citizens in Illinois. The report focuses on the extent which these services and programs have succeeded in their efforts to target minority seniors.

We are proud of the efforts to date in making our services more appropriate and accessible to minority and ethnic elderly, and, with your continued support, look forward to even greater successes in the coming year.

Paula A. Basta, Director
Illinois Department on Aging

Grace B. Hou, Secretary
Illinois Department of Human Services

Ngozi O. Ezike, MD, Director
Illinois Department of Public Health

Theresa Eagleson, Director
Illinois Department of Healthcare and Family Services

The Four State Agencies and their Services to Seniors

Illinois Department on Aging

The Illinois Department on Aging (IDoA) supports older adults to live independently in their own homes and communities. The Department recognizes the importance of programs and services that adapt to meet the needs and ensure the quality of life for an age cohort that continues to increase in longevity. Working with Area Agencies on Aging, community-based service providers, older adults and their caregivers, the Illinois Department on Aging strives to improve the quality of life for current and future generations of older Illinoisans.

Illinois Department of Healthcare and Family Services

The Illinois Department of Healthcare and Family Services (IDHFS) is responsible for providing healthcare coverage for adults and children who qualify for Medicaid, and for providing child support services to help ensure that Illinois children receive financial support from both parents.

Illinois Department of Human Services

The Illinois Department of Human Services (IDHS) assists Illinois residents to achieve self-sufficiency, independence, and health to the maximum extent possible by providing integrated family-oriented services, promoting prevention, and establishing measurable outcomes, in partnership with communities. The primary focus of the Department is on providing needed services to individuals and families, while assisting them to become self-sufficient members of society. The Department has instituted a new approach to service delivery, by enabling Illinois' citizens to seek solutions to their various needs with user friendly technology.

Illinois Department of Public Health

The Illinois Department of Public Health (IDPH) serves the state with a mission to promote health through the prevention and control of disease and injury. Its 200 different programs are designed to serve all residents and visitors in Illinois, but the vulnerable elderly are a distinct focus. Public health provides the foundation for gains in extending the length of human lives and improving the quality of those lives by activities such as setting standards for hospital and nursing home care, checking the safety of recreation areas and public restaurants. The IDPH oversight works to protect citizens against unsafe and unsanitary conditions, health threats and health disparities among racial groups.

Definition of Terms

Racial and ethnic minority populations

This report will use the categories and definitions of racial and ethnic minority populations used by the U.S. Department of Health and Human Services.

American Indian and Alaska Native

People having origins in any of the original peoples of North and South America (including Central America), and who maintains tribal affiliation or community attachment.

Asian

People having origins in any of the original peoples of the Far East, Southeast Asia, or the Indian subcontinent.

Black or African American

People having origins in any of the black racial groups of Africa.

Hispanic or Latino

A person of Cuban, Mexican, Puerto Rican, South or Central American, or other Spanish culture or origin, regardless of race. The U.S. Census Bureau American Community Survey (ACS) states this definition: “People who identify with the terms ‘Hispanic’ or ‘Latino’ are those who classify themselves in one of the specific Hispanic or Latino categories listed on the Census 2010 or ACS questionnaire — ‘Mexican,’ ‘Puerto Rican,’ or ‘Cuban’ — as well as those who indicate that they are ‘other Spanish, Hispanic, or Latino.’ Origin can be viewed as the heritage, nationality group, lineage, or country of birth of the person or the person’s parents or ancestors before their arrival in the United States. People who identify their origin as Spanish, Hispanic, or Latino may be of any race.”

Native Hawaiian and Other Pacific Islander

People having origins in any of the original peoples of Hawaii, Guam, Samoa, or other Pacific Islands.

Multiracial

People having origins in two or more of the federally designated racial categories. (Note: Though OMB and Census 2010 use “two or more races,” we use the term “multiracial” because it is the term most widely used and accepted by advocacy groups and state laws.)

White

People having origins in any of the original peoples of Europe, the Middle East, or North Africa.

Age

The definition of age as a basis for service is related to the funding source of programs, and for that reason, age of eligibility for services varies within and between state departments.

- In the **Department on Aging**, age 60 and older determines eligibility for services under the federal Older Americans Act and the state-funded portion of the Community Care Program, Aging's Home and Community-Based Medicaid Waiver program serving the elderly. Age 65 and older, and persons with disabilities age 16-64 with limited income determines eligibility for the Benefit Access Program. Age 55 determines eligibility for older worker services from the federal Department of Labor.
- In the **Department of Healthcare and Family Services**, age 65 is used as an eligibility factor for some Medical Assistance programs such as Seniors and Persons with Disabilities (SPD).
- The **Department of Human Services** has no age-based eligibility.
- The **Department of Public Health** has no age-based eligibility for services to older adults.

The Programs and Services within Each of the Four State Agencies that are Designed Specifically for Senior Citizens or Used by Some Senior Citizens

NOTE: Demographic data is not collected on all services due to the format of the federal report. Further, the eligibility age for services varies among funding sources, making a uniform report impossible.

Illinois Department on Aging

The Illinois Department on Aging serves and advocates for Illinoisans age 60 and older and their caregivers by administering programs and promoting partnerships that encourage independence, dignity and quality of life. The services are delivered through the Aging Network composed of the Illinois Department on Aging (IDoA), Area Agencies on Aging (AAAs), Care Coordination Units (CCUs), the Senior Health Insurance Program (SHIP), Senior Health Assistance Program (SHAP) sites, senior centers and many other local organizations. These community-based services and supports assist senior citizens to remain safe and independent in their own homes and communities for as long as possible. All services provided by IDoA and the Aging Network are available to minority senior citizens. The Department engages in specific planning activities to identify needs and evaluate the adequacy of existing programs to serve those in greatest need.

Older Americans Act Services

IDoA allocates Title III of the Older Americans Act (OAA) and State General Revenue Funds (GRF) appropriated for distribution through the 13 AAAs on a formula basis in accordance with OAA and its regulations. The goals achieved through the Intrastate Funding Formula (IFF) include targeting resources to areas of the State with higher concentration of older adults in greatest economic and social need. In addition, there is a special emphasis on persons who are low-income minority status and older adults living in rural areas. IDoA uses OAA funds to leverage state and local resources to expand and improve services.

In FY 2019, programs funded by the OAA served more than 511,065 seniors age 60 and over, or approximately 20 percent of Illinois' 2.5 million older adults. There are no mandatory fees associated with services but older adults may make contributions to help defray the costs. OAA funded services include supportive services that fall into categories of access, in-home and community services, as well as nutrition services, employment assistance and caregiver support.

Supportive Services

Supportive services include transportation, chore maintenance, legal services, outreach, and information and assistance. Although the funding for supportive services is relatively small, these services have a very positive impact on the quality of life of the older adult receiving the benefit.

Nutrition Services

During FY 2019, almost 136,000 older adults received Nutrition Services. The services include congregate and home delivered meals.

Congregate meals are served weekdays in over 400 sites throughout Illinois that include senior centers, churches, senior housing facilities, restaurants and community buildings. The program provides a nutritionally balanced meal that must include 33 1/3 percent of the Recommended Dietary Allowances (RDA) established by the Food and Nutrition Board of the National Academy of Sciences/National Research Council.

Home delivered meals are an option for an older adult who may have difficulty leaving their home and cannot personally prepare a nutritious meal. Volunteers who deliver meals to homebound older adults have an important opportunity to check on the welfare of the homebound and are encouraged to report any health or other problems that they may observe during their visits.

Caregiver Support

The Caregiver Support Program assists families caring for frail older members, as well as grandparents or older relatives who are caregivers for children 18 and younger. Services include information and assistance, respite, individual counseling, support groups and caregiver training. In addition, supplemental services are provided on a limited basis to complement care provided by caregivers.

Supplemental services may include assistive devices, legal assistance, school supplies and other gap filling services to address short-term caregiver emergency.

Persons Receiving Assisted Transportation Under the Older Americans Act During FY 2019

Race	Count
African Americans	140

American Indian or Alaskan Native	311
Asian	5,083
Caucasian	48,878
Other	4,678

Persons Receiving Home Delivered Meals Under the Older Americans Act During FY 2019

Race	Count
African Americans	10,080
Hispanic Origin	1,465
American Indian or Alaskan Native	44
Asian	358
Caucasian	29,824
Other	1,665

Employment

OAA supports community service employment and training. Funding goes to the Senior Community Service Employment Program (SCSEP) also known as the Title V Program. SCSEP is designed to assist adults age 55 and older in entering or re-entering the job market. The program is administered by IDoA with the cooperation of the AAAs, which are responsible for implementation at the regional and local levels.

Adult Protective Services

IDoA administers the Adult Protective Services Program (APS) that works to prevent abuse, neglect and financial exploitation of adults over the age of 60 as well as persons with disabilities between the ages of 18-59 living in the community.

In FY 2019, the Program received 21,348 reports of suspected abuse, neglect or financial exploitation for investigation and follow up. Trained case workers from 40 designated local agencies worked with victims to prevent further abuse and to arrange for needed services, such as in-home care, counseling, medical assistance, legal intervention or law enforcement assistance.

Long-Term Care Ombudsman

The Long-Term Care Ombudsman Program (LTCOP) was established to protect the rights of those individuals who live in a variety of licensed long-term care facilities. Traditionally, the Program's activities have included investigating and resolving complaints made by or on behalf of long-term care residents and providing information about residents' rights and choices when selecting a long-term care facility. Ombudsmen also provide community education and in-service training and monitor the development of laws, regulations and policies related to long-term care settings. In FY 2019, there were over 1,600 facilities in Illinois with over 144,000 beds or units and the LTCOP conducted 18,416 facility visits, provided 31,626 consultations and investigated 8,756 complaints. In 2014, the Ombudsman Program expanded to include the Home Care Ombudsman Program (HCOP). The Home Care Ombudsman Program has the responsibility of providing advocacy services to select individuals in home and community-based settings.

Senior HelpLine

The statewide toll-free Senior HelpLine provides information and assistance in English and Spanish on programs and services and links older adults age 60 and over as well as their caregivers to local services. Professionally trained staff assess needs, and provide referrals on home and community-based service options such as in-home services, home-delivered meals, caregiver support, local free transportation services and Medicare counseling. The Senior HelpLine staff also answers the dedicated APS Hotline and completes reports of suspected abuse, neglect, financial exploitation and self-neglect of adults over the age of 60 and persons with disabilities between the ages of 18-59, living in the community. In FY 2019, 132,692 calls were handled by the Senior HelpLine, of which 2,805 were from Spanish speaking households.

Black, Non-Hispanic	3,715
Hispanic	1,059
White	12,238
Unknown	1,191
Other	2,507

Benefit Access

The Department on Aging is responsible for determining eligibility for the Benefit Access Program (BAP). The BAP provides eligibility for two-years and offers applicants two (2) benefits: Secretary of State License Plate Discount and Seniors or Persons with Disabilities Ride Free Transit Cards on all fixed-route public transportation systems in the state. In FY 2019 approximately 126,181 Benefit Access Applications were received which resulted in 74,078 license plate discounts, 51,652 Seniors Ride Free and 36,060 Persons with Disabilities Ride Free Enrollments.

Senior Health Insurance Program (SHIP)

SHIP activities align with the IDoA's mission to help older individuals maintain their health and independence while remaining in their homes and communities. SHIP provides accurate objective counseling, assistance and advocacy on Medicare, Medicare Advantage Plans, Medicare Part D, private health insurance, and related health coverage for people with Medicare. Counseling is available through over 300 host organizations throughout the state offering one-on-one confidential sessions with certified counselors trained by the Department. In addition, SHIP provided outreach to educate individuals about their Medicare benefits through public forums, community presentations, and various publications. In FY 2019, SHIP counselors assisted over 119,000 Medicare beneficiaries. In addition, SHIP provided outreach to educate individuals about their Medicare benefits during over 2,000 events.

Native Hawaiian and Other Pacific Islander	196
Multiracial	246
White	69,604
Other	2,725

Community Care Program

The Department on Aging administers the Community Care Program (CCP), a community-based program whose aim is to support seniors' ability to remain in their own home and prevent the unnecessary institutionalization of people in Illinois who are 60 years of age and older. The program is designed to meet the needs of older adults who need support with household and personal care tasks. Services include in-home, adult day, emergency home response services, and automated medication dispensers. During FY 2019, CCP served an average of 68,000 elderly each month, thereby successfully diverting or delaying many of those individuals from entering a nursing facility. Note that this is only Fee-For-Service. There are additional participants receiving CCP services from a Managed Care Organization (MCO). CCP is a viable and cost-effective alternative to nursing facility care and the number of individuals it serves has increased significantly in past years. CCP is supported by State General Revenue funds as appropriated by the legislature. A portion of the cost for Medicaid eligible participants is reimbursed to Illinois through a federal Title XIX, Medicaid, Home and Community-Based Services Waiver. CCP complies with the Centers for Medicare and Medicaid Services (CMS) requirements for operation of a 1915(c) Waiver for the Elderly. Participants are evaluated through an initial comprehensive care assessment to determine their need for service and a person-centered plan is developed in collaboration with the individual. Annual reassessments ensure ongoing needs are identified and met.

IDoA provides meaningful access to services to older adults who are low-income minority with limited English proficiency in accordance with: (a) Presidential Executive Order 13166 of August 11, 2000, (65 FR 50121) and (b) Department of Health and Human Services "Guidance to Federal Financial Assistance Recipients Regarding Title VI Prohibition Against National Origin Discrimination Affecting Limited English

Proficient Persons” (68 FR 47311 August 8, 2003). In addition to ensure meaningful access to services, IDoA along with the Bureau of Refugee and Immigrant Services within the Department of Human Services and the Department of Public Health support a number of the Coalition of Limited English Speaking Elderly (CLESE) programs.

Assurance of Service by the Department on Aging to Minorities

Service plans developed in each of the 13 Area Agencies on Aging are submitted to the Department for approval, and the Department on Aging allocates funds based on published policies that the Department uses in funding and overseeing services to ensure services to minorities, (600: Services Allowable Under the Older Americans Act: 602.3). These policies include outreach activities to ensure participation of eligible older adults with special emphasis on those with the greatest economic and social need, as well as older adults with limited-English speaking proficiency. In addition, particular attention is paid to low-income minority individuals and others residing in rural areas.

Illinois Department of Human Services

Division of Family & Community Services

For many individuals, the first point of contact with the Illinois Department of Human Services (IDHS) is through the doors of one of the 76 Family Community Resource Centers across the state. These doors open to the IDHS system of social services for low-income families, administered and delivered through the Division of Family & Community Services. Cash and food assistance, child care, access to medical coverage, and help with employment and training are some of the needs that are served. Individuals and families are also referred to a vast network of community services, where additional programs are available, many of which are also funded through IDHS. The Division also provides services to at-risk and homeless persons and to immigrants and refugees. The programs, which are administered and delivered through the Division of Family & Community Services, have the goal of helping families achieve and sustain self-sufficiency.

Supplemental Nutritional Assistance Program

The Supplemental Nutritional Assistance Program (SNAP), formerly known as Food Stamps, is administered by IDHS for the U.S. Department of Agriculture (USDA) Food and Nutrition Services. SNAP benefits help low-income people buy the food they need for good health. A household's income, allowable deductions, and expenses are used to determine eligibility.

Temporary Assistance for Needy Families (TANF)

Temporary Assistance for Needy Families may be available to families with one or more dependent children. Assistance may help pay for food, shelter, and other expenses. Seniors who have a child under age 19 living with them may qualify.

Family Health Plans

Family Health Plans provide health coverage for children and parents or caretaker relatives of children. The public may apply for assistance at one of the 76 IDHS Family Community Resource Centers.

Affordable Care Act

As part of the healthcare expansion in Illinois, childless adults ages 19-64 are now eligible for health coverage through the state's Medicaid program or through the new Illinois Health Insurance Marketplace.

What is ABE?

The Application for Benefits Eligibility (ABE) is a website (<https://abe.illinois.gov/abe/access>) for customers that was launched in October 2013. Customers can use ABE to apply for SNAP, cash and Medicaid/CHIP. They can also send all required paperwork electronically using ABE.

What about people on Medicaid?

If a person already gets Medicaid, there is nothing else to do except to continue to inform us of changes and respond to redetermination notices when we send them. Medicaid is a form of health insurance and fulfills the ACA's health insurance coverage requirement.

Aid to the Aged, Blind, or Disabled

This program provides medical assistance and cash grants to persons who are Aged, Blind, or Disabled and financially eligible for Supplemental Security Income (SSI). Households may receive assistance from Supplemental Nutritional Assistance Program (SNAP) as well.

Refugee Senior Services Initiative

Refugees are eligible for federal funded program, which supports the cultural adjustment and social integration of older refugees through community-based organizations. The project provides services to reduce social isolation; assist seniors in accessing public benefits, including health-related resources; and helps seniors gain a basic understanding of financial management. In FY 2019, 274 older refugees were served.

For immigrants who are seniors, a statewide network of 59 community agencies was funded under the Immigrant Integration programs to provide a wide range of services designed to help low-income limited-English-proficient seniors to apply for public benefits (such as SNAP and Medicaid), connect with appropriate community services (such as housing and food pantries), and help them apply for citizenship. Translation and interpretation services are provided to help immigrant seniors with English language barrier.

Senior Benefit Programs Provided By Family & Community Services

All programs are for age 65+, except for SNAP (Food Stamps) that includes age 60+.

Challenges to Services

Many seniors can be resistant to seeking out services provided by our Family and Community Resource Centers. Processes and requirements to programs can be challenging to understand as each program's eligibility requirements are different. Some seniors feel uncomfortable sharing information about income and assets in order to determine eligibility for services. IDHS encourages seniors to contact our FCRCs or schedule a visit so IDHS staff can help them understand the benefits of our services.

Division of Family and Community Services - Bureau of Family Nutrition

The Bureau of Family Nutrition is part of the Division of Family and Community Services. The Bureau focuses on efforts to improve the health and well-being of Illinois residents through the provision of nutritious foods and nutrition education. Services are provided through a network of community partners including social service agencies and local farmers. Bureau staff also provides technical assistance, training, and quality assurance activities to ensure the delivery of high-quality services.

The Commodity Supplemental Food Program

The Commodity Supplemental Food Program (CSFP) is a food distribution and nutrition education program administered federally through the Food and Nutrition Services (FNS) of the United States Department of Agriculture (USDA). A primary goal of CSFP is to improve the health of low-income elderly people at least 60 years of age by supplementing their diets with nutritious foods.

The Senior Farmers Market Program

The Senior Farmers Market Nutrition Program operates through a grant received from USDA. The goals of the program include: providing resources to improve the health and well-being of Illinois seniors through increased consumption of fresh fruits and vegetables, and aiding in the development of additional market opportunities for farmers.

During the 2019 summer season, approximately 420 farmers in 38 counties throughout the state, including Chicago/Cook County, participated in the Senior Farmers Market Nutrition Program (SFMNP). The participating farmers received education prior to displaying their Farmers Market Nutrition Program signage and redeeming the SFMNP checks/coupons. In the summer 2019 season, Farmers Market checks/coupons were distributed in booklets of \$25.00 to seniors, age 60 and above and who have a household income of not more than 185 percent of the federal poverty income guidelines to purchase fresh fruits, vegetables, herbs and honey from participating farmers at local Farmers' Markets. Also in 2019, over 29,100 SFMNP booklets were distributed to seniors and of that, approximately 22,570 booklets (112,846 checks) were successfully redeemed by participating farmers.

Seniors Served by SFMNP by Race, Ethnicity FY 2018-2019

Race/Ethnicity	Percent
Caucasian	36.38
Black/African American	46.88

Division of Substance Use Prevention and Recovery (SUPR)

The Division of Substance Use Prevention and Recovery (SUPR) provides a system of care along the continuum of prevention, intervention, treatment and recovery support where individuals with substance use disorders, those in recovery and those at risk are valued and treated with dignity and where stigma, accompanying attitudes, discrimination, and other barriers to recovery are eliminated.

Services include Medication Assisted Recovery, Withdrawal Management, Outpatient, Intensive Outpatient, Residential Rehabilitation, Recovery Home, Halfway House, Early Intervention, Recovery Support and Case Management. During SFY 2019, 1057 unduplicated seniors were admitted to SUPR-funded services. These individuals were on average 67 years of age.

SUPR Program Admission Age 65 and Above by Race, Ethnicity - FY 2019

Race/Ethnicity	Individuals	Age
American Indian	10	68
Asian	0	
Black or African American	698	65
Caucasian	290	69
Other Single Race	59	72
Total	1057	67

Challenges to Services

There are a number of challenges to providing services to this ever-increasing older population. As the population increases, a greater percentage of older men and women will be without family support and have lower income levels. In addition, many seniors are resistant to discussions they view as challenging their competence and independence.

The percentage of seniors with substance use disorders is expected to increase with the aging of the “baby boomer” generation. This is exacerbated by their unique susceptibility to opioid addiction due to the prescribing of pain medication for chronic and terminal illnesses. Assessment, intervention and treatment will require increased knowledge, skill and sensitivity to the needs and characteristics of persons in this segment of our client population.

Division of Developmental Disabilities

The Division of Developmental Disabilities provides person-first services and supports for individuals with developmental disabilities and their families. Possible services include:

- In-home supports to encourage independence
- Respite care to provide temporary relief to caregivers
- Training programs to teach life and work skills
- Residential living arrangements with security and care
- Adaptive equipment
- Other supports to improve quality of life

State-Operated Developmental Centers

There are 7 state-operated developmental centers in Illinois. They are certified by the state as Intermediate Care Facilities for persons with developmental disabilities.

Developmental Disabilities FY2019 Services for persons age 60 and older				
Race/Minority Group	Community-Based Programs for the Developmentally Disabled	State-Operated Developmental Centers for persons with developmental disabilities	Total	%

Unknown	288	0	288	5%
Total	5,611	450	6,061	100%
Hispanic Origin				
Not Hispanic	4,655	437	5,092	84%
Hispanic	956	13	969	16%
Total	5,611	450	6,061	100%

When an adult with a developmental disability reaches the age of 60, he or she can choose to retire from community day services programs. Other daytime service options for seniors with developmental disabilities who choose to “retire” include staying at home, attending a local Adult Day Care program funded by the Division of Developmental Disabilities, or a combination of both.

Challenges to Services

Adults with developmental disabilities are living longer and therefore comprise a higher percentage of the total population served as compared to the past. Seniors with developmental disabilities may require more visits to the doctor, may be hospitalized more frequently and may remain in the hospital for longer stays. Sometimes extended convalescence care in a long-term care facility is required before the senior can return to their home. These increased health care and support needs place increased demands on the individuals, whether family members or paid staff, caring for them as compared to younger adults with developmental disabilities.

Division of Mental Health

The DHS Division of Mental Health (DMH) is responsible for planning and purchasing an array of mental health services for adults with serious mental illnesses and children and adolescents with serious emotional disturbances. DMH currently funds 206 community-based organizations to provide services to persons with mental illnesses across the state. The DHS/DMH also operates a system of 7 hospitals and one treatment detention facility providing treatment to adults.

Specialized Gero-Psychiatric Services

With funding from the Administration for Community Living of the U.S. Department of Health & Human Services (the grant funding agency), WRAP was delivered to 151 adults age 60 and older in calendar year 2019. Locations where classes were held included public housing authority residences, senior centers, churches, public libraries, and recreation centers. In addition, 11 new WRAP certified facilitators were identified and trained to teach WRAP to seniors at all-day, in-person trainings plus online webinars held in McHenry County (N=6) in August and in Cook County (N=5) in November. We continue to plan new classes and enroll new participants for remote delivery of WRAP.

Individuals Age 65 and Older Receiving DMH Purchased Mental Health Services in FY 2019

During FY 2019, approximately 6.2 percent of the total number of individuals receiving DMH purchased community based mental health services were 65 years of age or older. Descriptive information for this population is displayed in the tables. Data is partitioned by age, race/ethnicity, Hispanic origin and gender.

Individuals Age 65 and Older Receiving Community Mental Health Services - FY 2019		Number of Individuals	Percentage
Race/Ethnicity	American Indian/Alaskan Native	8	0.28
	Asian	81	2.87
	Black/African American	473	16.77
	More than One Race Reported	3	0.11

	Hispanic or Latino Origin Unknown	394	13.97
	Not Hispanic or Latino	2,230	79.08
	TOTAL	2,820	100
Gender	Female	1,724	61.13
	Male	1,096	38.87
	TOTAL	2,820	100
Age	65 to 74	2,354	83.48
	75+	466	16.52
	TOTAL	2,820	100

Challenges to Services

Although many older adults enjoy good mental health, approximately 20 percent of persons 60 years of age and older experience mental disorders that are not part of normal aging. The most common disorders among older adults are anxiety and depression along with a high rate of suicide for older adult males aged 85 and older. The assessment, diagnosis, and treatment of mental disorders among older adults provide unique challenges due to stigma, ageism, transportation, mobility, lack of workforce education and experience in older adult's issues and payment of services. Most community mental health agencies are not certified to bill Medicare.

Division of Rehabilitation Services

This office is the state's lead agency for providing direct support services to individuals with disabilities. The mission of the Division of Rehabilitation Services (DRS) is to work in partnership with people with disabilities and their families to assist them in making informed choices to achieve full community participation through suitable employment, education, and independent living opportunities. DRS disability-related programs impact annually more than 230,000 people with disabilities in Illinois. The major programs include the Home Services Program which provides in-home services to disabled individuals who are younger than 60 at the time of application for services, and the Vocational Rehabilitation Program which assists individuals with disabilities in obtaining or retaining employment.

Older Blind Services

In addition, DRS Bureau of Blind Services operates the Older Blind program, which is designed to assist older individuals with vision impairments to live independently in the community through provision of services related to vision loss. This is the only DRS program that specifically targets older individuals, aged 55 years and older.

Accessibility for Non-English Speaking Minority Seniors

DHS has made strides to improve outreach and make the application process as easy as possible for seniors by enabling them to designate a representative. Measures have also been taken to ensure service is accessible to non-English speaking minority seniors, especially Spanish speaking seniors. Vital documents, such as forms, brochures and posters are printed in dual languages. The Department periodically reviews the bilingual staffing situation and ensures that translator services are available.

Office of Hispanic and Latino Affairs (OHLA) works with local community agencies to assist limited English proficient (LEP) clients with interpreter services. When a request is received for interpreter services, OHLA staff conducts all Spanish services. All other non-Spanish interpreting services will be conducted by our DHS grantee (local community agencies). If these options are not available, DHS will then contact the Fiscal Year Master Contract Vendor for interpreting services. Through these multiple efforts it is the intention of DHS to bridge the language gap for non-English speaking clients.

Illinois Department of Healthcare and Family Services (HFS)

HFS Medical Benefits for Seniors

HFS operates several programs that provide medical benefits for seniors. The largest program, known as the Medical Assistance Program, pays for medically necessary services for seniors who meet qualifying criteria. HFS administers its programs for seniors under the Illinois Public Aid Code, Title XIX of the federal Social Security Act, and the 1915(c) Home and Community-Based Services (HCBS) Waivers. These programs are funded jointly by the State and Federal governments. Some initiatives, such as the nine Home and Community Based services programs in operation in Illinois, are administered by the Department's sister state agencies and co-reporters.

HFS offers a wide range of medical coverage, including all mandatory and many optional Title XIX services. The primary categories of services that the minority elderly receive are listed in the table entitled Primary Categories of Services. Licensed practitioners, licensed facilities, and other non-institutional providers enrolled in the Medical Assistance Program provide these services. The eligibility groups serving a large number of the elderly include:

Seniors and Persons with Disabilities (SPD)

This group is composed of persons 65 years of age or older, persons who are blind, and persons who are disabled. The income eligibility level for SPD persons is 100 percent of the Federal Poverty Level (FPL). The resource limit (excluding home, car, and burial plot) is \$2,000 for individuals or \$3,000 for a couple.

Medicare Supplementation Programs

Qualified Medicare Beneficiary (QMB) Program

This program helps individuals pay for their monthly Medicare Part A premiums, Medicare Part B premiums, and Medicare deductibles and coinsurance amounts. Persons may be eligible if they receive Medicare Part A coverage, their income is at or below 100 percent of FPL, and their resources (excluding home, car and burial plot) do not exceed the resource standard of \$7,730 for one person or \$11,600 for a couple.

Specified Low Income Medicare Beneficiary (SLIB) Program

This program helps individuals pay for their monthly Medicare Part B premiums if they receive Medicare Part A coverage. Persons may be eligible if their income is more than 100 percent but less than 120 percent of the FPL, and their resources do not exceed the resource standard of \$7,730 for one person or \$11,600 for a couple.

Qualifying Individual (QI) Program

This program helps individuals pay for their monthly Medicare Part B premiums if they receive Medicare Part A coverage. Persons may be eligible if their income is greater than 120 percent FPL but less than 135 percent FPL, and their resources do not exceed \$7,390 for a single person and \$11,090 for a couple. (Reimbursement is 100% federal.)

HCBS Waiver Programs

All HCBS 1915(c) waiver programs provide services to individuals who would otherwise require or be at risk of requiring care in an institutional setting. Services provided under the waivers help clients remain in their homes or in community settings. HCBS waivers operated by the State include:

Adults with Intellectual Disabilities

This program helps individuals age 18 or older with intellectual disabilities who are at risk of placement in an Intermediate Care Facility for persons with Intellectual Disabilities. The Department of Human Services, Division of Developmental Disabilities is the operating agency for this waiver. Services include adult day care, residential habilitation, home-based services, day habilitation, and supported employment.

Elderly

This program helps individuals who are at risk of nursing facility placement and are (a) aged 65 and older or (b) physically disabled and aged 60 through 64. The Department on Aging is the operating agency for this waiver. Services include in-home, adult day services, and emergency home response.

Persons with Brain Injury

This program helps individuals with brain injury, of any age, who are at risk of nursing facility placement due to functional limitations resulting from the brain injury. The Department of Human Services, Division of Rehabilitation Services is the operating agency for this waiver. Services include homemaker, home health aide, personal care, adult day care, habilitation, and supported employment.

Persons with Disabilities

This program helps individuals who are under age 60 at the time of application and are at risk of placement in a nursing facility. Individuals who are 60 years or older but began services before age 60 may choose to remain in this waiver. The Department of Human Services, Division of Rehabilitation Services is the operating agency for this waiver. Services include homemaker, home health aide, personal care, respite, adult day care, and environmental access.

Persons with HIV or AIDS

This program helps individuals who are diagnosed with Human Immune Deficiency Virus or Acquired Immune Deficiency Syndrome and are at risk of placement in a nursing facility. The Department of Human Services, Division of Rehabilitation Services is the operating agency for this waiver. Services include: homemaker, home health aide services, personal care, nursing, home delivered meals, and physical, occupational, and speech therapies.

Supportive Living Program

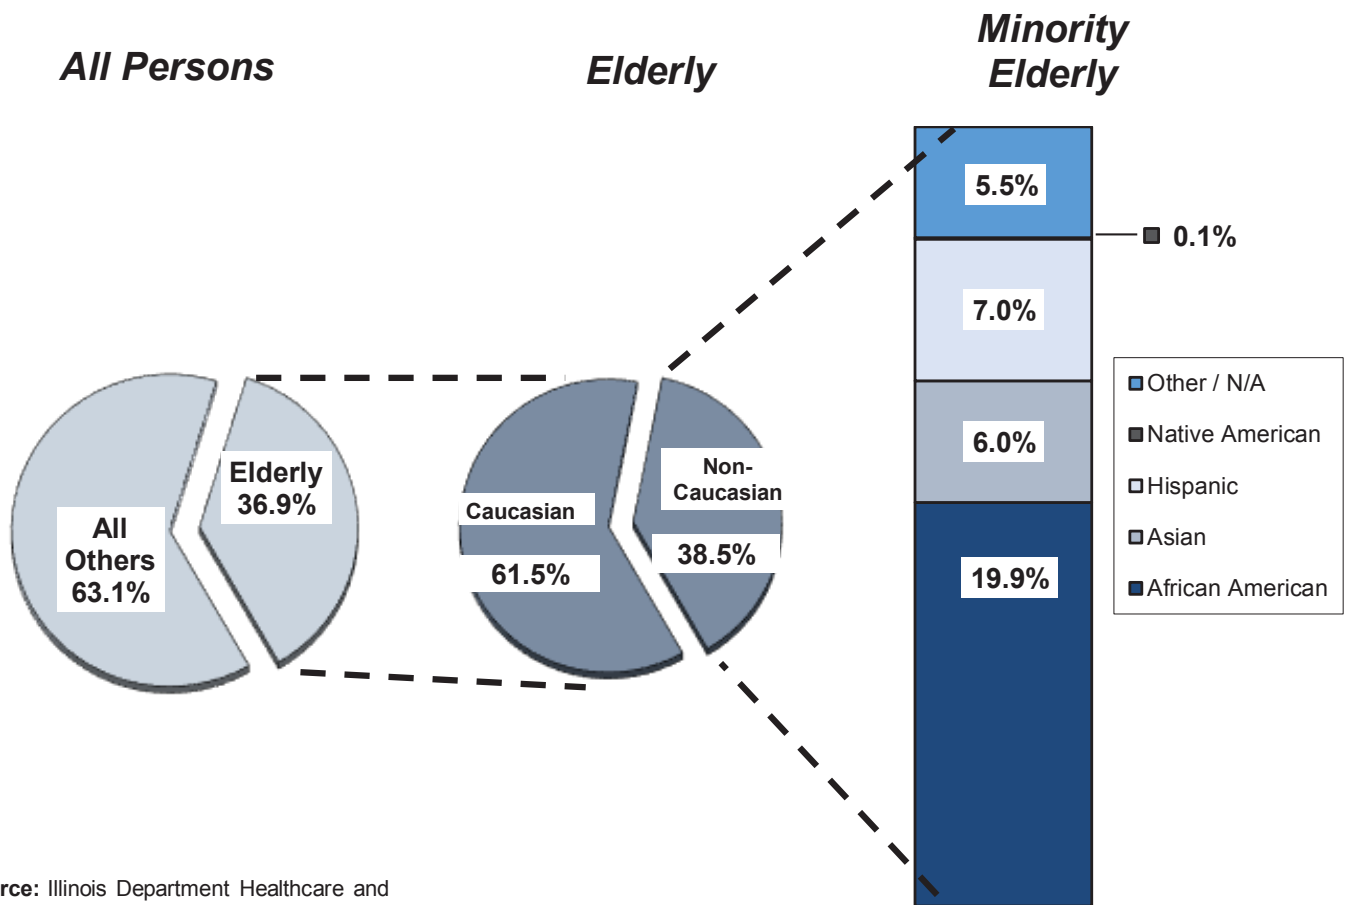

This program helps individuals age 22-64 with a physical disability, or persons age 65 or over, to reside in their own apartment in an assisted living style setting. This program provides assistance with activities of daily living and requires the scheduled and unscheduled needs of the individual be met 24 hours a day. The Department of Healthcare and Family Services is the operating agency for this waiver. Services include intermittent nursing, personal care, medication oversight with self-administration, laundry, and housekeeping. The program also maintains dementia care settings, which are being expanded statewide.

Utilization Data

In FY19, a total of 35.9 Million Fee For Service (FFS*) claims were received and processed under Medical Assistance Program (MAP) accounting for \$5.48 Billion in expenditures and 57.61 Million services. Of these amounts, 36.9 percent of all services and 29.8 percent of all expenditures were for the elderly. Minority Elderly accounted for 38.5 percent of services and 35.9 percent of liability for the Elderly.

All Charts represent Medical Assistance eligible individuals age 65 years and older.

Federally Required Medical Assistance Services in FY 2019

The following services are required to be provided by HFS in the Medicaid, CHIP, and certain All Kids programs:

- Certified pediatric and family nurse practitioner services
- Emergency services
- Emergency service for non-citizens
- EPSDT: Early and Periodic Screening, Diagnostic and Treatment Services for individuals under age 21
- Family planning services and supplies
- Federally qualified health center services
- Freestanding birth center services
- Home health services
- Inpatient hospital services
- Laboratory and X-ray services
- Medical/surgical services by a dentist
- Nurse midwife services
- Nursing facility services (age 21 and over)
- Outpatient hospital services
- Physician medical and surgical services
- Rural health clinic services
- Tobacco cessation counseling for pregnant women
- Transportation to covered medical services

Optional Services Provided in FY 2019

The following services are covered by HFS in the Medicaid, CHIP, and certain All Kids programs but are not required to be covered under federal law:

- Audiology services
- Case management services
- Certified Registered Nurse Anesthetist
- Chiropractic services
- Clinic services (Medicaid Option/Community Mental Health)
- Clinical Nurse Specialist
- Dental services, including dentures
- Diagnostic services
- Durable medical equipment and supplies
- Eyeglasses
- Home and Community-Based Services through federal waivers
- Hospice services
- Inpatient psychiatric services (IMD) for individuals 21 and under, including State-operated facilities
- Intermediate care facility services for individuals with intellectual disabilities, including State-Operated facilities
- Nursing facility services for individuals under 21 years of age
- Occupational therapy services
- Optometric services
- Physical therapy services
- Podiatric services
- Prescribed drugs
- Preventive services
- Prosthetic devices
- Rehabilitative services (Medicaid Rehab Option)
- Services provided through a managed care health plan
- Special TB services
- Speech, hearing and language therapy services

Illinois Department of Public Health

The Illinois Department of Public Health was created in 1877 to regulate medical practitioners and to promote sanitation. Today, IDPH is responsible for protecting the state's 12.8 million residents, as well as countless visitors, through the prevention and control of disease and injury. The Department's nearly 200 programs touch virtually every age, aspect and cycle of life. The Department is organized into ten offices and six regional health offices, each of which addresses a distinct area of public health. Each office operates and supports numerous ongoing programs and is prepared to respond to extraordinary situations as they arise.

Center for Minority Health Services

The Center for Minority Health Services (the Center) is designed to assess the health concerns of minority populations in Illinois and to assist in the creation and maintenance of culturally competent programs. To achieve this goal, the Center works with other programs within the Department of Public Health and with other state and local governmental entities as well as community and faith-based organizations to heighten awareness of minority health issues and services across the state.

The Center promotes the health and well-being of racial and ethnic minorities (Black or African American, Asian American, American Indian and Alaska Native, Hispanic or Latino, Native Hawaiian and other Pacific Islander) and linguistic minority populations throughout Illinois, by increasing the IDPH's capacity to respond effectively to the critical public health needs of those communities of color, and continue working to establish health disparity elimination goals. Racial and ethnic minority groups still experience poorer health status. While as a whole, the racial and ethnic minority population in Illinois continues to grow, the future of health of Illinois as a whole will be influenced substantially by our success in improving the health of those racial and ethnic minorities.

Through funding made available from general revenue and federal grants, the Center oversees several programs that seek to address the disparities in health outcomes for racial and ethnic minorities. These programs specifically focus on education, outreach, intervention, and providing access to care for disadvantaged communities. The programs also focus on delivering information and services in a culturally competent and linguistically appropriate manner at all times.

Federal Programs

Minority AIDS Initiative – AIDS/Drug Assistance Program (ADAP): This program provides linkage into ADAP and other drug assistance programs for HIV positive minority individuals through innovative means by initiating, modifying, or expanding educational outreach, and linkage to ADAP services that address under and unmet needs in communities of color that are disproportionately impacted by the HIV/AIDS epidemic. This includes sub-populations such as women, young adults, men of color who have sex with other men,

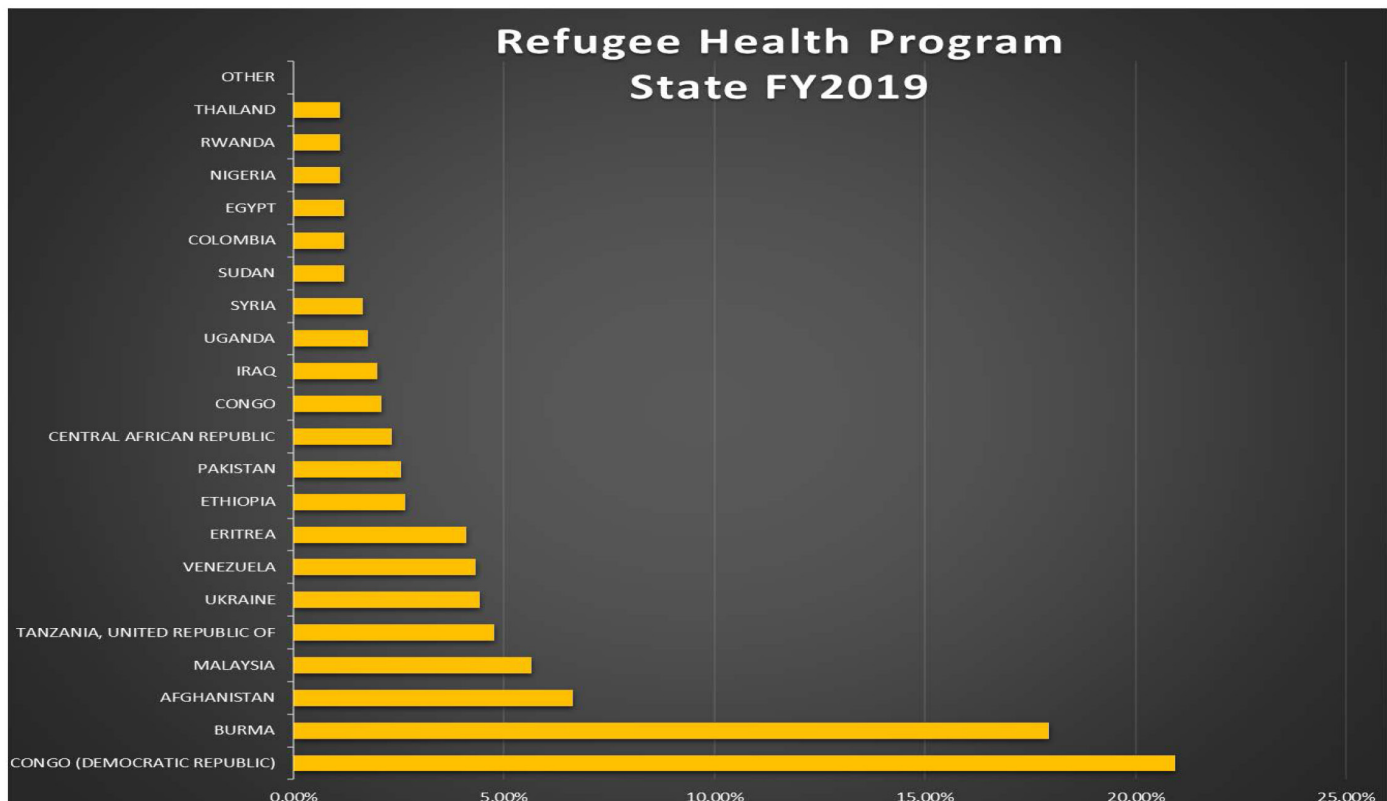

the homeless, uninsured and underinsured individuals, those recently released from correctional institutions, and persons with a dual diagnosis of chemical dependency. In FY 2019, the Minority AIDS Initiative ADAP program, through community partners, conducted targeted education and awareness activities across Illinois reaching over 22,000 high-risk individuals, assisted with successful enrollment of 72 new individuals into ADAP program, and re-enrollment of 157 individuals that were lost or almost lost to care.

Refugee Health Program (RHP): The goal of the Refugee Health Program (“RHP”) is to provide eligible clients with culturally and linguistically appropriate comprehensive health assessments, including follow-up and referrals for health conditions identified in the assessment process. The RHP is housed under the Office of Minority Health and is contracted by the Illinois Department of Human Services to provide these services. Through RHP, newly arriving refugees to Illinois receive a comprehensive health examination that includes screening for communicable diseases, age appropriate immunizations, nutritional assessments including home visits, referrals for follow-up care, and interpretation services.

In addition, medical case management is offered to some refugees arriving with complex medical conditions.

There are five contracted medical providers: three local health departments and two private clinics that conduct the initial health assessment and provide follow-up care or referrals as needed. The Office of Refugee Resettlement and U.S Centers for Disease Control and Prevention (CDC) provide guidelines for domestic follow-up evaluation in newly arriving refugees. The Refugee Health Screening Program collaborates with the following Refugee Providers: Aunt Martha’s Health Center, Aurora; DuPage County Health Department, Wheaton; Touhy/Mt. Sinai Health Center, Chicago; Rock Island Health Department, Moline/Rock Island; Winnebago County Health Department, Rockford; Heartland Health Outreach, Chicago; World Relief, Aurora/DuPage; and Pan African Association, Chicago.

Of the 903 refugees provided health assessments in Illinois in state SFY 2019, 43 (<5%) were above the age of 60. The top five Countries of Origin were The Democratic Republic of Congo, Burma, Afghanistan, Malaysia, and Tanzania.

General Revenue Funded Programs:

Communities of Color Special At Risk Population: This initiative funds HIV prevention, education, testing, and care programs targeting communities of color-specifically programs with the capacity to reach special at-risk minority populations including men who have sex with men, homeless, ex-offenders, sex workers, those with a history of mental illness or substance abuse, and other difficult to reach populations. These specific efforts are necessary due to the unique problems that many of these individuals may face that places them at greater risk for HIV disease.

Illinois Hepatitis B Outreach, Awareness and Education to Immigrants: This funding provided outreach, awareness, and education to foreign born Asian and African Immigrant and Refugee Communities regarding Hepatitis B and referral and linkage opportunities for screening, vaccination, and treatment services. These specific efforts are necessary due to the unique problems that many of these individuals may face that places them at greater risk for Hepatitis B infection. Higher rates of chronic Hepatitis B infection exist particularly among foreign born populations from Asia and Africa.

Wellness on Wheels (WOW) Initiative – Mobile Administration: This initiative allows culturally competent and linguistically appropriate services to be offered where, and when clients need them, and immediate adjustments can be made to the outreach plan based on input from clients, disease outbreaks, and special community events. There are currently four (4) Wellness on Wheels mobile units in operation. While the mobiles are housed in Chicago, Cairo, and Springfield, they provide services on a statewide basis.

In FY 2019, multiple screenings were conducted in the mobiles from immunization, prostate screening, dental, HIV, Hepatitis C, Gonorrhea, Syphilis, and Chlamydia. In FY 2019, the WOW units participated in 1,144 events making screening services accessible at a number of places including the Illinois State fair, in rural communities and in inner cities and community events, making services accessible to underserved residences.

Increasing Access to Health Care Services: In conjunction with the WOW mobile units, this program made it possible for preventative health screenings to occur in an innovative and culturally and linguistically appropriate manner throughout the medically underserved areas of Illinois.

Services through this funding were provided in familiar/non-threatening environments and tailored to ensure relevance to the circumstances and conditions of the target population. Community and faith-based organizations utilized the van at no cost in their communities.

Number of Individuals reached for all programs in FY19						
Program	Outreach	Prevention/ Education	Events	Testing Administered	Seniors	% of Population Served
ADAP	22,000	9,633	n/a	n/a	37	<1%
Communities of Color At Risk	131,228	10,289	149	2,823	753	30%
Hepatitis B Outreach	14,316	9,006	652	960	420	44%
Increasing Access to Health Care	21,312	14,656	60	8,734	2,296	27%
Wellness on Wheels - Mobile Admin	1,144	4,428	66	15,571	396	21%

Special Partnerships

Flu Clinics: In partnership with Walgreens, they provided more than **211** flu shots in underserved communities, reaching underinsured, uninsured, rural and migrant populations for FY 2019. The program provided **61** seniors to receive the flu shot.

First Ladies Health Initiative: The Center participated in HIV testing and counseling opportunities that included one day of testing at 9 churches in Chicago's South side and West side locations. Over 400 individuals received free HIV testing and other health screenings. The goal is to raise awareness and promote HIV testing in churches and reduce the stigma associated with testing.

Black Women's Expo: Over 500 individuals received HIV, Hepatitis C, and other basic screenings at this event. The center coordinated a workshop on breast and cervical cancer for women of color. Over 20,000 individuals attended the three day event. Informational materials were also disseminated at the event.

Summit of Hope: The Center participates in the signature program of the Illinois Department of Corrections to provide over 200 HIV screenings and counseling services at Summit of Hope events around the State.

Illinois Association of Agencies and Community Organizations for Migrant Advocacy (IAACOMA) advocates for, and provides health services, fair treatment, and equal opportunities for migrant farm workers and other underserved and underrepresented Latino/Hispanic communities in Illinois. Once a year, IAACOMA hosts a conference for agencies that work with migrant communities in Illinois. The Center serves on conference planning committee and is a regular sponsor of the conference.

Suicide Prevention

The Suicide Prevention, Education, and Treatment Act (Public Act 095-0109) designates the Department as the lead agency for suicide prevention in Illinois and creates the Illinois Suicide Prevention Alliance. The alliance is a multidisciplinary board representing statewide organizations that focus on the prevention of suicide, mental health agencies, survivor of suicide, law enforcement, first responders, universities and other organizations that address the burden of suicide. Several members represent the older adult population in addition to specific minority populations (e.g. African American, Asian American, Latin American, and gay, lesbian, bisexual, and transgender). Education, awareness, training and organizational capacity were done to increase awareness of suicide prevention and decreasing stigma around suicide and mental and emotional problems, specifically through trainings and promotion of suicide prevention messages.

County-level suicide data were mapped by age group (<http://dph.illinois.gov/sites/default/files/publications/suicide-combined.pdf>).

Injury Data

Illinois submitted injury related data to the U.S. Centers for Disease Control and Prevention to ensure the state was included in the national State Injury Indicator's Report. The report is a surveillance effort to gain a broader picture of the burden of injuries across the nation. Illinois submitted fatal and non-fatal data and a variety of injuries for each age group. The national report will include data on unintentional drowning, fatal falls, fatal fire, fatal firearm, homicide, fatal motor vehicle, poisoning, suicide and traumatic brain injury.

Hospital Discharge Data (HDD) - FFY 2015

REASON FOR HOSPITALIZATION	65-74 years old		75-84 years old		85+ years old	
	Number	Rate*	Number	Rate*	Number	Rate*
Hospitalizations for all injuries	7,777	794.5	10,140	1955.8	11,822	4219.9

NOTE:

Injury surveillance methods for use with ICD-10-CM coded hospitalization and emergency department data are expected to be finalized next year. ICD-10-CM injury case definitions are being finalized by a group of state, federal and private experts. Next year's report may include updated data.

Alzheimer's Disease Research Grant

Funding for Alzheimer's Disease research is appropriated to the Illinois Department of Public Health through the Alzheimer's Disease Research Fund, which was established to receive funding from the Illinois income tax check-off fund. The tax check-off funds provide grant awards for research on the cause, progression, clinical care and cure for Alzheimer's disease and related disorders from income tax contribution funds. Established in 1985, more than \$4 million has been raised through the income tax check off program. Since its inception, the check-off funds have supported more than 182 research grants.

Grant awards must be used to investigate the biomedical, technical or psychosocial study pertaining to Alzheimer's disease and related disorders. Topics may include, but are not limited to: epidemiology, etiology, pathology, diagnosis, care, treatment, evaluation, cure, social or economic impacts, gerontology, nursing, psychology, respite care, in-home care, long-term care, health care finance and psychosocial issues. Grant awards are available only to Illinois researchers. The Alzheimer's Disease Advisory Committee was instrumental in establishing the criteria for the grant application.

For FY 2019, two applications for research grant funds were received for consideration. A peer review panel reviewed, scored and ranked the applications and presented recommendations to the Alzheimer's Disease Advisory Committee, which completed the review process and made recommendations for grant awards to the Department. One application was chosen for FY 2019 funding.

Alzheimer's Disease Advisory Committee

The Alzheimer's Disease Advisory Committee (ADAC) was established in 1985 through the Alzheimer's Disease Assistance Act and consists of approximately 17 voting members and five non-voting members appointed by the IDPH Director. The Directors of the following state agencies, or their designees, serve as non-voting members: Department on Aging, Department of Healthcare and Family Services, Department of Public Health, Department of Human Services, and Guardianship and Advocacy Commission.

Appointed members include persons who are experienced in research and the delivery of services to individuals with Alzheimer's disease or a related disorder and their families. Per the Act, the membership structure shall include:

- (1) one individual from a statewide association dedicated to Alzheimer's care, support, and research;
- (2) one individual from a non-governmental statewide organization that advocates for seniors;
- (3) the Dementia Coordinator of the Illinois Department of Public Health, or the Dementia Coordinator's designee;
- (4) one individual representing the Community Care Program's Home and Community Services Division;
- (5) one individual representing the Adult Protective Services Unit;
- (6) 3 individuals from Alzheimer's Disease Assistance Centers;
- (7) one individual from a statewide association representing an adult day service organization;
- (8) one individual from a statewide association representing home care providers;
- (9) one individual from a statewide trade organization representing the interests of physicians licensed to practice medicine in all of its branches in Illinois;
- (10) one individual representing long-term care facilities licensed under the Nursing Home Care Act, an assisted living establishment licensed under the Assisted Living and Shared Housing Act, or supportive living facilities;
- (11) one individual from a statewide association representing the interests of social workers;
- (12) one individual representing Area Agencies on Aging;
- (13) the Medicaid Director of the Department of Healthcare and Family Services, or the Medicaid Director's designee;
- (14) one individual from a statewide association representing health education and promotion and public health advocacy; and
- (15) one individual with medical or academic experience with early onset Alzheimer's disease or related disorders.

The ADAC reviews programs and services provided by state agencies directed toward persons with Alzheimer's disease and related dementias, and, by consensus, recommend changes to improve the state's response. ADAC's recommendations are reflected throughout this state plan.

The Alzheimer's Disease Assistance Act requires the Department to prepare a state Alzheimer's Disease Assistance (ADA) plan to guide research, diagnosis, referral and treatment services. The plan contains reports from the Alzheimer's Disease Assistance Centers and the Alzheimer's Disease Research Fund and must be submitted every three years in consultation with the Alzheimer's Disease Advisory Committee. Additionally, the report includes recommendations from the committee to improve state services based on reports provided by state agencies serving persons with Alzheimer's disease and related dementias.

Illinois Tobacco Prevention and Control Grant

The Illinois Tobacco Quitline is funded through the Illinois Department of Public Health. This free tobacco counseling resource is available to Illinois residents. The Illinois Tobacco Quitline, 1-866-QUIT-YES, has counselors to provide expert advice, addiction assessment, customized quit plans, quit kits, craving support and follow-up. The Quitline is available to help 7-days-a-week (7:00 a.m.– 9:00 p.m., Monday through Friday, and 9:00 a.m. - 5:00 p.m., Saturday and Sunday), or via the website www.quityes.org. The Illinois Tobacco Prevention and Control Program funds statewide and targeted media campaigns to promote the services of the Illinois Tobacco Quitline. In FY 2019, there were 18,823 total callers to the Quitline for in-depth tobacco cessation services and 4,781 callers were seniors 65 years and older (25.4%). Of seniors who called the Quitline, 72.5 percent were white, 24.8 percent were black and 3.2 percent were other races.

Women’s Health and Family Services

Division of Population Health Management

Carolyn Adam Ticket for the Cure Community Grant Program

On July 6, 2005 PA 94-0120 was signed into law, creating the Illinois Ticket for the Cure instant lottery ticket. Net revenue from the sale of this ticket went to the Illinois Department of Public Health (IDPH), Office of Women’s Health for the purpose of making grants to public or private entities in Illinois for funding breast cancer research, funding supportive services for breast cancer survivors and those impacted by breast cancer and for funding breast cancer education. This legislation expired December 31, 2011.

On July 11, 2011 PA 97-0092 renewed the legislation extending the Illinois Ticket for the Cure instant scratch-off lottery ticket game as well as updated the name of the ticket to be The Carolyn Adams Ticket for the Cure instant scratch-off lottery ticket in honor of the memory of the late Carolyn Adams, Director of the Department of Lottery. This legislation also revised the Ticket for the Cure Advisory Board to include professional titles more closely involved with breast cancer programs and breast cancer research.

The total amount of funding awarded to Community and Research grants from inception of the sale beginning January 2006, including the last round of awards (January 2016-December 31, 2016) of the instant scratch-off lottery ticket is approximately \$10,378,188. Nearly all past grantee organizations served older women and most, if not all, of past grantees served minority populations.

Currently, there is not a Carolyn Adams Ticket for the Cure grant program available. However, the Carolyn Adams Ticket for the Cure instant lottery ticket game and fund has been signed into law by Public Act 99-0917, extending this legislation until December 31, 2026. We will have a Community grant application and a Research grant application available and award grants in FY 2019.

Conferences/Educational Events

On June 5th and 6th, more than 250 women and family health advocates gathered at the Bone Student Center on the Campus of Illinois State University in Normal, Illinois for the eighteenth annual Women and Families Health Conference. The day and a half conference, sponsored by IDPH, provided education cardiovascular disease, family planning, breast cancer, cervical cancer and HPV, infant mortality, breastfeeding, adolescent health and more reaching underserved populations, and Maternal and Child Health Programs. Participants included local health department staff, health professionals and community agencies.

Women's Health Grant Programs Targeting Minority Women - Fiscal Year 2019

The Office of Women's Health provides grant funding to agencies to provide community-based programs for women. Some programs specifically address the issues of minority women, but few specifically target senior women. The Life Smart for Women (LSFW) program is one of the grant programs which includes some senior and minority women. LSFW is 10-weeks and encompasses various aspects of overall health, mostly pertaining to prevention and healthy lifestyles.

Illinois WISEWOMAN Program

The Illinois WISEWOMAN Program (IWP) serves participants of the Illinois Breast and Cervical Cancer Program (IBCCP), who are 40-64 years of age, by providing screenings for cardiovascular disease (CVD) risk factors. Participants who are identified as having CVD risk factors, such as hypertension, high cholesterol, high glucose and/or high triglyceride levels, smoking, or elevated Body Mass Index (BMI), are provided with clinical resources and referrals through community-based and clinical linkages to decrease or eliminate their risks of CVD.

In FY 2019, the IWP screened 629 women of which 38% were of Hispanic Origin. In FY 2019, the following Races were served: approximately 6% were African-American, and approximately 43% were Asian Or Native Hawaiian/Pacific Islander. Of the total women served in FY 2019, approximately 59 percent of those women were between the ages of 50 and 64.

Illinois Breast and Cervical Cancer Program

The Illinois Breast and Cervical Cancer Program is a statewide program which offers free breast and cervical cancer screenings for women between the ages of 35 and 64 who have low incomes and no health insurance. Women diagnosed with breast or cervical cancer while enrolled in the program can receive treatment benefits through the Illinois Department of Healthcare and Family Services.

Demographics on the Rise

- Every baby boomer will be over 65 by 2030.
- By 2035, it is projected that older adults will outnumber children for the first time in US history.
- Between today and 2060 the under 18 population will grow by 8% and the 65 and older population will grow by 92%.
- The number of people 65 and older will grow from 49 million to 95 million between today and 2060 with 65 and older growing by 92%, 85 and older growing by 198%, and 100 and older growing by 618%.
- The 85 and older population is expected to more than triple, from 6.7 million today to 19.7 million by 2060.
- Minorities are expected to become the majority in 2044 with more than half of all Americans projected to belong to a minority group. By 2060, nearly one in five of the nation's total population is projected to be foreign born.
- Immigration is projected to become the primary driver of population growth starting in 2030 due to the population aging and a rising number of deaths.
- The white population is projected to shrink due to the demographic momentum of younger, more racially diverse cohorts.

Minority Aging

Today's older Americans are predominantly White, but the demographics of older America will undergo a dramatic transformation in the next few decades.

The non-Hispanic African American population age 65 and older was 4,587,094 in 2017 and is projected to grow to 12.1 million by 2060. In 2017, African Americans made up 9% of the older population. By 2060, the percentage is projected to be 13%.

The Hispanic American population (of any race) age 65 and older was 4,204,122 in 2017 and is projected to grow to 19.9 million by 2060. In 2017, Hispanic Americans made up 8% of the older population. By 2060, the percentage is projected to be 21%.

The non-Hispanic American Indian and Alaska Native population age 65 and older was 272,250 in 2017 and is projected to grow to more than 648,000 by 2060. In 2017, American Indian and Alaska Natives made up 0.5% of the older population and this number is projected to be 0.7% by 2060. The number of Americans age 65 and older who reported they were American Indian and Alaska Native in combination with one or more races was 568,611 in 2017.

The non-Hispanic Asian American population age 65 and older was 2,262,155 in 2017 and is projected to grow to 7.9 million by 2060. In 2017, Asian Americans made up 4% of the older population. By 2060, the percentage is projected to be 8%.

There are some major differences in the aging of the minority population as compared to the aging of White Americans. The onset of chronic illness in minorities is usually earlier than in Whites.

- Minorities have a higher incidence of obesity and late onset diabetes.
- Health problems among minorities are underreported to healthcare practitioners.
- Minorities frequently delay seeking health-related treatments.
- Minorities have often been excluded from drug research.
- Some of the factors contributing to poor mental health among minorities include poverty, segregated and disorganized communities, poor education, unemployment, stereotyping, discrimination, and poor healthcare.

Changing Demographics

According to the U.S. Census Bureau, in 2019 older Illinoisans (age 65 and older) represented 16.1 percent of the population. This is a 27 percent increase over the last ten years. Older adults age 85 and older are the fastest growing segment of this population.

The nation's 65 and older population is projected to nearly double in size in coming decades, from 56 million today to 95 million people in 2060. As a result, the share of people aged 65 and older will grow from about 16.5 percent to nearly a quarter of the population in 2060.

The number of people 85 years and older is expected to nearly double by 2035 and nearly triple by 2060.

The non-Hispanic White population is projected to shrink over coming decades, from 197 million today to 179 million people in 2060— even as the U.S. population continues to grow. Their decline is driven by falling birth rates and rising number of deaths over time as the non-Hispanic White population ages. In comparison, the White population, regardless of Hispanic origin, is projected to grow from 253 million to 275 million over the same period.

The Black or African American population is projected to increase from 44 million to 61 million by 2060 (from 13 percent to 15 percent of the population).

Meanwhile, the Hispanic population is projected to grow from 56.6 million to 119 million by 2060. Nearly one in three U.S. residents would be Hispanic.

The Asian population is projected to go from 17.4 million to 34.4 million by 2060. Its share of the nation's population is expected to rise from 5.9 percent to 9.1 percent during this time period.

The Native Hawaiian and Other Pacific Islander population is expected to nearly double, and the number of people who identify themselves as being of Two or More Races is projected to almost triple, from 8.5 million to 25 million during the period between 2016-2060. The population of people who are Two or More Races is projected to be the fastest growing racial or ethnic group over the next several decades, followed by Asians and Hispanics.

For Asians, the driving force behind their growth is high net international migration.

Among the remaining race groups, American Indians and Alaska Natives are projected to rise from 4.3 million to 5.5 million by 2060 (or from 1.3 to 1.4 percent of the total population).

By 2030, the older population, 65 and over, will be about 1 billion and by 2050, 1.6 billion of the total population of 9.4 billion. That will be double the population of that age group of 49.2 million in 2016.

The non-Hispanic, single-race White population is projected to decrease by 2060 with a population of 181.9 million, 16 million less than in 2015 (197.9 million). In fact, this group is projected to slowly decrease from the 2020s to 2060 and comprise less than half of the total population.
