Hazel Crest Police Department 2022 Received Camera Grant Funds Report

Please see the attached data to satisfy the requirement of each law enforcement agency that received camera grant funds (**for Body Worn Cameras**) must provide a report to ILETSB by May 1st of each year indicating compiled statistics for the cameras purchased with the funds under the grant. The information reported in this document is accurate as of the date of April 21, 2023.

- Number of cameras received by the agency: **37**
- Number of cameras actually being worn by officers: **30**
- Brief description of the review process used by supervisors within agency:

Sergeants and Deputy Chiefs will randomly review a pre-determined number of body worn camera videos for each officer/sergeant, each month. These random reviews shall be documented on the department's body camera review report.

Reviews of BWC recordings are intended to assess: officer safety tactics, performance, appropriate use of device and camera position, and to identify material that may be appropriate for training or guidance. Supervisors also review recorded body camera footage for appropriate use of dialogue and de-escalation techniques, professionalism, and appropriate use of force.

Supervisors shall identify any areas in which additional training or guidance is required. Recordings may be used as referenced and supporting documentation in instances of exemplary police actions for commendation purposes.

Respectfully Submitted,

Edward Beard, Deputy Chief of Police
