Executive Summary

P.A. 96-1495 (SB 3538), which took effect on January 1, 2011, not only contained a number of reforms to the 641 Police and Firefighter pension funds, but it also mandated CGFA to complete a report on their financial status. When the report published last in December of 2017, the latest data available from the Department of Insurance was for FY 2016. This report is a follow-up that adds one year of data, analyzing a ten-year period from Fiscal Year 2008 through Fiscal Year 2017.

The Act created a second tier of benefits for newly hired police and fire personnel after January 1, 2011 and included a change in the funding methodology for municipalities. The benefit and funding changes contained in P.A. 96-1495 were outlined in both the February 2012 and January 2015 CGFA *Fiscal Analysis of the Downstate Police and Downstate Fire Pension Funds in Illinois* reports.

Where the February 2012 *Fiscal Analysis* report provided a glimpse into the future under the new benefit structure and funding law, this report provides something of a “look back” over a very tumultuous ten-year time period, given the 2008 stock market downturn and the lingering effects of the Great Recession. Municipal contributions to Police and Fire pension funds during FY 2007 through FY 2010 were governed under the statutory provisions, which predated P.A. 96-1495. The latter seven years of data in this report, FY 2011 – FY 2017, abide by these provisions of the Act, which require the amortization of 90% of unfunded liabilities by 2040.

All of the data contained in this report was gathered from the pension reports that individual Police and Fire pension funds file annually with the Public Pension Division of the Illinois Department of Insurance (DOI). CGFA did not independently verify the accuracy of the data gathered from the DOI. Note that FY 2013 has insufficient data for “volume stats” like aggregate headcount and fund count; however, the data is robust enough to be included in “per-fund stats” like average retirement annuity, aggregate funded ratio, and rate of return.

Statutory Requirements – Formation of Police and Fire Pension Funds and Eligible Participants

The Illinois Pension Code mandates that any city, village, or town of 5,000 but less than 500,000 inhabitants that employs at least one full-time police officer or firefighter must establish and administer a Police and Fire pension fund. Fire protection districts that have full-time paid firefighters must also establish firefighter pension funds. The Pension Code provides that municipalities having less than 5,000 inhabitants can elect to establish Police and/or Fire pension funds via referendum. By the end of Fiscal Year 2017, there were 350 Police funds and 291 Fire funds. The reason for the disparity between Police and Fire funds is generally attributable to the consolidation of smaller fire services into fire protection districts.

Plan Governance

Five-member boards of trustees govern Police and Fire pension funds. The mayor of the municipality or the president of the fire protection district, whichever is applicable, appoints two members. Two members are elected from amongst the active participants, and one member is elected from amongst the following beneficiaries: for police, any beneficiary including retirees and survivors; for fire, only a retired or disabled firefighter.

Funding

For a portion of the period of time covered in this report, FY 2007 – FY 2010, municipal contributions to Police and Fire pension funds were governed under the statutory provisions in effect prior to P.A. 96-1495. These old

provisions held that Fire funds were required to amortize all unfunded liabilities by 2033, while Police funds had 40 years after the date of establishment of the pension fund to amortize all unfunded liabilities.

P.A. 96-1495, which went into effect on January 1, 2011, started affecting data in FY 2011. The Act changed the funding methodology for Police and Fire pension funds and added a penalty for delinquent municipal pension contributions. Downstate Police and Fire funds are now required to be 90% funded by the end of FY 2040. Starting in FY 2016, pension funds became empowered to intercept State grants to municipalities in a gradually increasing amount such that by FY 2018, the entire amount of State grants to a municipality delinquent in its pension contributions may be intercepted by the pension fund. The historical employer contribution amounts shown in this report may not reflect the annual employer contribution amounts recommended by the pension fund's actuary or the annual Department of Insurance tax levy.

TABLE 1: Benefit Levels

The chart below outlines the benefit levels for Police and Fire pension funds for Tier 1 and Tier 2 active members. As noted below, P.A. 96-1495 did not change employee contribution rates, the benefit multiplier, or the maximum pension for Tier 2 members. However, the Act did change the final average salary period and the retirement age for new hires on or after January 1, 2011. The act also gave Tier 2 members less favorable COLA's and a penalty for early retirement.

<u>Features</u>	<u>Tier I Downstate Police</u>	<u>Tier I Downstate Firefighters</u>	<u>Tier II Police and Fire</u>
Employee Contributions	9.91% of Salary	9.455% of Salary	No Change
Final Rate of Earnings (FRE) for Pension Calculation	Salary on Final Day of Service	Salary on Final Day of Service	Highest Average Consecutive 8-out-of-the-last-10-years' Salary; Pensionable Salary must be less than or equal to SS Wage Base
Full Retirement	Age 50 with 20 yrs	Age 50 with 20 yrs	Age 55 with 10 yrs
Early Retirement Deduction	(Not Applicable)	(Not Applicable)	Min. Age 50 with 10 yrs, reduced .5% FRE per month younger than age 55
Pension Formula	2.5% x FRE x Years of Service	2.5% x FRE x Years of Service	No Change
Maximum Pension	75% of FRE	75% of FRE	No Change
COLA's	3% Compounded	3% Compounded	The lesser of 1/2 the CPI-U or 3% of the Original Annuity

Overview of Financial Condition of All Funds

History of Accrued Liabilities

The information shown on the following pages was derived from the DOI's [2017 Biennial Public Pensions Report](#).

Funded Ratio: Police and Fire funds ended FY 1991 with aggregate funded ratios of 75.09% and 76.40%, respectively. In FY 1999, the aggregates reached peaks of 76.37% and 78.57%, respectively, but then began a year-over-year downward trend. Police and Fire pension funds bottomed out in the low 50's in the wake of the 2008 stock market downturn, but have gradually increased each year since 2009.

Unfunded Liabilities: Over the 26-year period shown below, net assets for Police and Fire pension funds have essentially grown at a pace of 6.25% per year while unfunded liabilities have expanded at 9.83% per year. Combined, Article 3 & 4 funds had \$953 million in unfunded liabilities in FY 1991. By FY 2017, that figure had jumped to \$11.019 billion.

Scope of Report

This report reflects Police and Fire pension funds that have been aggregated by asset class in order to control for differences arising from statutory investment limitations. Pension funds are grouped as follows: funds with assets less than \$2.5 million, funds with assets over \$2.5 but less than \$5 million, funds with assets over \$5 but less than \$10 million, and funds with assets over \$10 million.

Funds with assets under \$2.5 Million: By law, funds with less than \$2.5 million in assets may invest up to **10% of their assets in equities** through separate accounts managed by life insurance companies and qualified mutual funds. The other 90% of assets must be invested in fixed income and money market instruments.

Funds with assets between \$2.5 and \$5 Million: Downstate Police and Fire funds with at least \$2.5 million in assets are permitted to invest **up to 45% of assets into selected equities** such as mutual funds and separate accounts of insurance companies, but not common nor preferred stock.

Funds with assets between \$5 and \$10 Million: Downstate Police and Fire funds with at least \$5 million in accrued assets may retain an investment advisor to invest **up to 45% in qualified equities** along with mutual funds and separate accounts of insurance companies. These funds must have an **appointed investment advisor** to invest in common and preferred stock.

Funds with assets over \$10 Million: During Fiscal Years 2007-2010, the Illinois Pension Code did not grant expanded exposure to equities for funds in excess of \$10 million. P.A. 96-1495, enacted January 1, 2011 and first affecting FY 2011 data, provided for expanded investment authority in equities for funds of this asset class. After July 1, 2011, this law enabled funds to invest **up to 60% of assets** in qualified equities. One year later on July 1, 2012, this law further expanded equity exposure to **up to 65% of assets**.

Fund Count: Graphs in the following section were created by assigning each fund an asset class designation and then totaling the number of funds in each asset class. The Market Value of Assets of each fund determines their designations and may change on an annual basis.

The number of Downstate Police and Fire funds has remained relatively constant over the last ten years, with slight variations every year. Total Fund Count changes only when a new fund is formed or when two or more funds consolidate. While the number of Downstate funds experienced growth between 2008 and 2014, Police funds only increased by one and Fire funds by four over the last 10 years.

CHART 1: Fund Count

The following pie charts depict the distribution of Downstate Police and Fire funds across the four Asset Classes. The proportions do not vary much over the FY 2008-2017 period covered in this report. Downstate Police funds are disproportionately large, as there are more funds that fall into the “Over \$10 Million” asset class than in the three other asset classes combined. Downstate Fire funds predominantly fall into the categories of “small” or “large”, as the middle tiers of asset classes account for just under a quarter of the total.

CHART 2: Police Fund Count by Asset Class

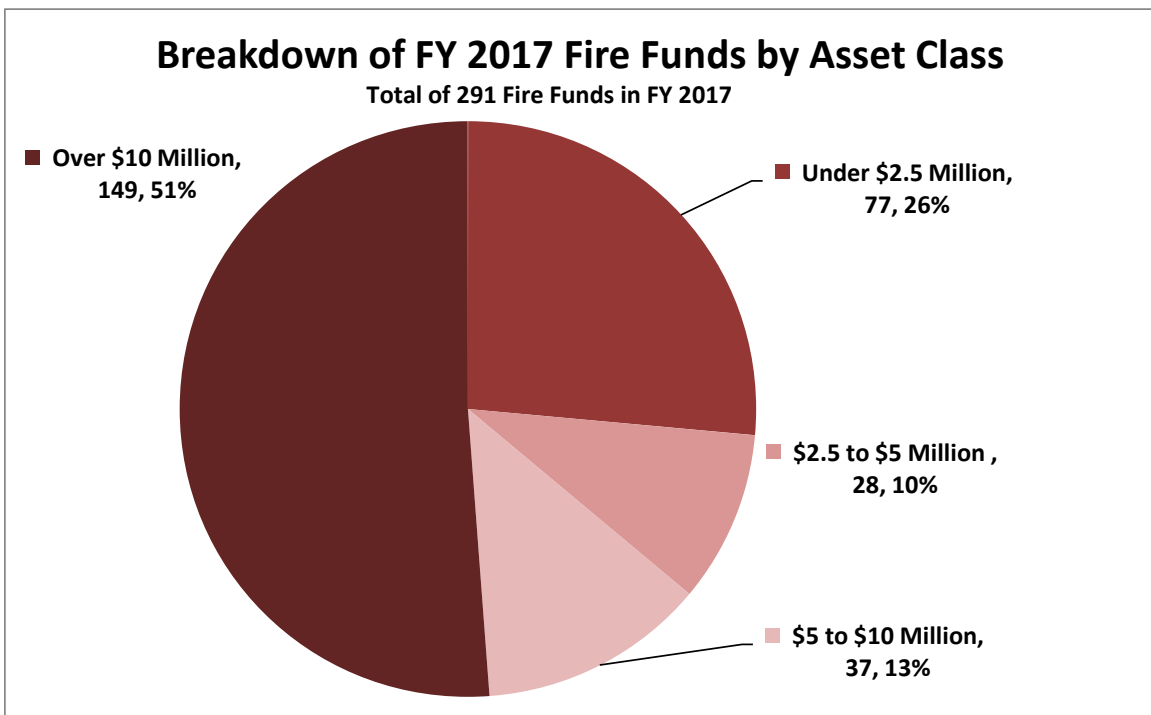

CHART 3: Fire Fund Count by Asset Class

In addition to the creation and consolidation of funds, there is also the possibility of a fund changing asset classes by accruing or losing assets over the course of a fiscal year. The smallest asset classes bear a trend of a shrinking fund count over the period of study, implying that funds naturally grow in size as the years pass and thus graduate into a higher asset class. Year-to-year market variability plays a role, as well. The spike in FY 2009 for Police funds in the \$2.5 to \$5 million asset class chart below is likely due to fallout from the Great Recession of 2008-2009, and the corresponding dip in the largest asset class's chart supports this conclusion.

CHART 4: Fund Count - Under \$2.5 Million

CHART 5: Fund Count - \$2.5 to \$5 Million

The \$5 to \$10 million asset class has the most variability and appears to be a temporary label for the asset classes both immediately above and below it. The largest asset class, which encompasses funds with over \$10 million in assets, has grown every year except in FY 2016 for Fire and FY 2009 for both Funds, which suggests that the market downturn and lingering effects of the Great Recession adversely affected a few funds that lie just above \$10 million in assets.

CHART 6: Fund Count - \$5 to \$10 Million

CHART 7: Fund Count - Over \$10 Million

Active Member and Retiree Headcount: The following series of charts aggregates and compares the number of active members to the number of retirees. The active member headcount naturally grows with fund count, although the number of retirees does not. From FY 2008 to FY 2017, active member headcount in Fire funds decreased by 174 members, while retiree headcount grew by 1,235. In Police funds, the discrepancy is even wider as the ranks of actives decreases by 875 members, while retirees grew by 1,818.

CHART 8: Headcount - Aggregate Police

CHART 9: Headcount - Aggregate Fire

The following pair of charts provides further insight into the demographic makeup of the funds. Whereas the previous graphs depicted Active Member and Retiree headcount in straightforward bar charts, the next set offers retiree headcount numbers from the perspective of comparing funds to each other. The blue line below shows the median number of retirees receiving benefits from a fund. Superimposed upon the median line is a box-and-whisker plot. This style of graph includes a box portion that refers to the middle 50% of funds as the interquartile range¹, and two 'whiskers' that refer to the outer quarters of funds on both the high and the low ends of the distribution.

Combining the box-and-whisker plot with the median breaks the data down into convenient quarters: a lower 25%, a middle 50% (25% each above and below the intersecting median line), and an upper 25%.

Regarding police fund data, 75% of funds have never had more than 27 retirees in any fiscal year. The median starts at 9 retirees in FY 2008 and grows to 13 in FY 2017². The police fund with the largest head count is Rockford with a recorded 207 retirees in FY 2017.

CHART 10: Headcount Distribution - Aggregate Police

¹ Interquartile range, or IQR, is a statistical measure of spread or variability and is represented as a single value. The value is calculated by finding the difference between the 25th and 75th percentiles of the distribution, thus eliminating the influence of outlying (abnormally high or low) data points. Since the IQR is a single value, it is often paired with a box-and-whisker plot that uses the same data to provide a clearer graphical snapshot of the distribution as a whole.

² Data from FY 2013 was incomplete and therefore displayed misleading totals for previous chart types. FY 2013 has data for 600 out of an expected 651 funds, so there is a reasonable expectation that the 92% of funds whose data is present is representative of Downstate Police and Fire funds as a whole for any value that is not an aggregate sum. However, FY 2013 data has been included here as these graphs compare the funds to one another and do not sum any values.

Downstate Firefighter funds have significantly deflated numbers when compared to Police funds. The median fire fund has single-digit retirees (from 5 in FY 2008 up to 8 in FY 2017). However, the largest fund (Rockford) has over 200 retirees in its last seven years of data (this excludes the missing data from 2013). The size discrepancy between the largest of funds and the majority of funds is representative of the variance amongst downstate funds, regardless of topic (including but not limited to any statistic that is a sum such as headcount, retiree count, assets, and liabilities)³. The largest funds dwarf the “common” fund by several degrees of magnitude, and therefore skew any measure that includes an average of all funds.

CHART 11: Headcount Distribution - Aggregate Fire

³ The use of this type of chart lies in depicting the demographics of “the common fund”. Whereas Rockford’s police fund retiree population is now well over 200, Orland Hills recorded just their second retiree in FY 2013. Funds like Rockford, Peoria, and Springfield skew the arithmetic average such that such a statistic completely outweighs the presence of the smallest of funds. The box-and-whisker plot remedies this by showing every fund and highlighting the middle 50% of funds. Unlike most charts, the height of the whiskers is not an indication of how many funds it represents; instead, it emphasizes the degree to which funds like Peoria and Springfield stand out when compared to the rest of the police pension funds in Illinois.

The Downstate Police and Fire funds with under \$2.5 million in assets have the smallest population of active and retired members as well as the largest retiree-to-active headcount ratio. The graphs below show the number of retirees in both Police and Fire funds drops significantly in recent years while the number of active members stays relatively constant.

CHART 12: Headcount - Under \$2.5 Million, Police

CHART 13: Headcount - Under \$2.5 Million, Fire

Contrary to what the foregoing graphs might suggest, Downstate Police and Fire funds have relatively few retirees. Police and Fire funds of this asset class have never had more than 10 retirees over the last 10 years. In FY 2017, 75% of Police funds had four or fewer retirees drawing benefits. In the same year, only 25% of Fire funds had more than two retirees; in fact, over half the Fire funds do not provide benefits to a single retiree.

CHART 14: Headcount Distribution - Under \$2.5 Million, Police

CHART 15: Headcount Distribution - Under \$2.5 Million, Fire

Downstate Police funds belonging to the second-smallest asset class cumulatively have retired member headcounts in the low to mid 200s while active headcount peaked in FY 2009, but declined for five years before increasing slightly in FY 2016. FY 2017 exhibited further decline from FY 2016's numbers, just shy of FY 2014's retiree count. In FY 2009, Downstate Fire actives also peaked, possibly as a side effect of the Great Recession dropping larger funds into this asset class when they would have otherwise been in the \$5 to \$10 Million asset class. Downstate Fire funds had consistent retired member enrollment in the low 100s while active tallies behave similarly to Police but with slightly higher variance.

CHART 16: Headcount - \$2.5 to \$5 Million, Police

CHART 17: Headcount - \$2.5 to \$5 Million, Fire

Downstate Police funds had a median retiree count between 3 and 5 persons over the period between FY 2008 to FY 2017. No fund had more than 12 at a time, while the majority of funds finished FY 2017 with 7 or fewer. Downstate Fire funds showed slightly more variation than their Police counterparts, with the maximum number of retirees in this asset class increasing from 17 in 2014 to 7 in 2017. This may be reflective of a fund that was part of the \$5-\$10 million class finally ratcheting back into their proper category after falling in the 2008-2009 recession. However, the majority of Fire funds had 5 or fewer retirees. The median retiree count for Fire funds of this asset class ranged from 2 to 4 persons, but has been steadily declining.

CHART 18: Headcount Distribution - \$2.5 to \$5 Million, Police

CHART 19: Headcount Distribution - \$2.5 to \$5 Million, Fire

Funds maintaining \$5 to \$10 million in assets cumulatively have about twice as many actives and retirees than funds in the \$2.5 to \$5 million class. In the final year of complete data, FY 2017, Police funds accounted for 1,136 actives and 499 retirees. Fire funds totaled 725 actives and 416 retirees. Both funds' active count peaked in 2009, likely related by the Great Recession.

CHART 20: Headcount - \$5 to \$10 Million, Police

CHART 21: Headcount - \$5 to \$10 Million, Fire

Downstate Police funds in this asset class had a median retiree count between seven and nine persons in the last 10 fiscal years. The majority of funds had fewer than 13 retirees in in that same span, but no fund had more than 22. Downstate Fire funds in this asset class once again have a lower median, with only six or seven in most years, but with greater variation. In FY 2017, these funds experienced their highest median at nine, with the largest fund totaling 52 retirees.

CHART 22: Headcount Distribution - \$5 to \$10 Million, Police

CHART 23: Headcount Distribution - \$5 to \$10 Million, Fire

In the over \$10 million asset class, the headcounts are on an entirely different scale than previous asset classes. In FY 2017, active headcount for Police funds totaled 10,917 while Fire funds had 7,800. Police and Fire funds maintained almost two actives per retiree, with 6,654 retirees and 4,569 retirees respectively.

CHART 24: Headcount - Over \$10 Million, Police

CHART 25: Headcount - Over \$10 Million, Fire

The distribution of retirees in Downstate Police and Fire funds within the largest asset class is heavily skewed. For both Police and Fire, the median lies in the low 20s for all years (although, the Fire funds do vary to a greater degree). The majority of Police funds have 37 or fewer retirees, and yet the largest fund accounts for 207 in FY 2017. The majority of Fire funds have fewer than 45 retirees, but the largest fund has 213 in FY 2017 and over 200 starting in FY 2010.

CHART 26: Headcount Distribution - Over \$10 Million, Police

CHART 27: Headcount Distribution - Over \$10 Million, Fire

Average Retirement Annuity: The data used in this section is the collective sum of retirement benefits, not including disability or survivor annuities, divided by the total number of retirees in all funds. Using this method, downstate Police and Fire funds experienced approximately equal and steadily rising payouts in all years. Annuities in FY 2008 start at \$45,622 and \$45,617, and peak at \$65,034 and \$64,181 for Fire and Police, respectively in FY 2017.

CHART 28: Average Pension – Aggregate

Below are the average retirement annuities for Fire and Police funds in the smallest and second smallest asset classes. The average retirement annuity in these asset classes grew steadily, but more slowly than in the aggregate chart at the beginning of this section. In fact, Fire and Police annuities in both of the asset classes are significantly less than the amounts in the “all funds” chart on the previous page.

CHART 29: Average Pension - Under \$2.5 Million

CHART 30: Average Pension - \$2.5 to \$5 Million

The charts below continue the trend of growing retiree annuities. Comparing each asset class, the overarching trend is that the funds pay more in annuities if they have more assets in the fund. Underscoring that finding is the fact that the funds with larger assets also have more members and retirees (as seen in the previous section's graphs), and thus the funds experience exponential growth in annuity payouts as they grow in size. Only the funds in the largest asset class have annuities comparable to the overall chart at the beginning of this section, which is unsurprising considering funds in the largest asset class represent quite a few more retirees than smaller funds, some of which have zero to two retirees cumulatively over the last ten years.

CHART 31: Average Pension - \$5 to \$10 Million

CHART 32: Average Pension - Over \$10 Million

Funded Ratio: The graphs in the following section were created by dividing the sum of the funds’ actuarial value of assets by the sum of their actuarial accrued liabilities. For each asset class, there is also a distribution graph using box-and-whisker plots to further detail how funded ratios vary amongst funds (these graphs show non-aggregate data).

The aggregate funded ratio of Police funds does not significantly differ from the aggregate funded ratio of Fire funds in any year. In fact, the lines on the graph nearly overlap entirely. The difference is largest in FY 2011 and FY 2014 (see table below for details). Both dipped into the low 50s in FY 2009 but recover to the mid-upper 50s by FY 2016. However, FY 2017 seems to signal some distress among the funds as the funding ratio dipped to just over 55%, similar to 2010-2011 levels.

CHART 33: Funded Ratio – Aggregate

Of all the discrepancies between Police and Fire funds in this report, none is greater than the difference in funded ratios for funds of the smallest asset class. The inequality stems from a number of statutory differences.

- When transferring service credit out of IMRF due to the creation of a new fund, statute requires firefighters to make up the difference, plus interest, between their 4.5% IMRF contributions and the 9.455% contribution rate required by an Article 4 Fire fund.
- Under the same circumstances, police officers are under no such obligation to match the difference between their 4.5% IMRF contributions⁴ and the Article 3 Police fund contribution rate of 9.91%.
- The statute governing the amortization of unfunded liabilities during the 10 year period covered in this report gave new Police pension funds 40 years from the creation of the fund to pay off all liabilities, whereas all Fire funds must have been fully funded by FY 2033.
 - Hence, the shortened amortization schedule leads to a proportionally greater unfunded liability payment to Fire funds than their Police counterparts receive.

In addition to the statutory differences listed above, another reason for the disparity lies in the fact that roughly half of the smallest Fire pension funds are “fire protection districts”. On average, these are significantly better funded than pension funds for municipal fire departments. As sole-purpose government entities, fire protection districts tend to fund their pensions at a higher rate than municipalities with diversified, competing demands on their budget.

CHART 34: Funded Ratio – Under \$2.5 Million

⁴ Public Act 98-0729 passed the 98th GA and was signed into law on July 16, 2014. This legislation will allow police officers with IMRF credit to transfer over their contributions, 6% compounded interest on those contributions, and an amount deemed to be the employer contribution into their newly formed Police fund. Funds will then start with a higher funded ratio than under previous law.

The graphs below show the distribution of downstate Police and Fire funds in the smallest asset class⁵. In all years, the median Police fund hovers around 50% before dropping until FY 2014, when it began a steady rise that seems to be levelling off in FY 2017. The Fire funds hovered around 75%, until FY 2009 when it dropped well below that mark.

CHART 35: Funded Ratio Distribution - Under \$2.5 Million, Police

CHART 36: Funded Ratio Distribution - Under \$2.5 Million, Fire

⁵ The FY 2011 data required for these distribution graphs (and the ones to follow) was incomplete due to an internal shift to new actuarial software at the DOI's public pension division. Fortunately, the median in FY 2011 follows the trend set forth in surrounding years.

The less-pronounced difference between funds belonging to the second smallest asset class show some residual effects of the factors that differentiated Police and Fire funds with under \$2.5 million in assets. Over the duration of this report’s window of observation, the aggregate funded ratio of Fire funds started at 68.6%, experienced a high of 74.8%, dropped to 62.2%, and eventually found itself back at 68.6% (zero change over the last ten years). Meanwhile, the Police funds have experienced a more smoothly paced, slow decline, ending the 10-year period covered in this report down 13.7 percentage points.

CHART 37: Funded Ratio - \$2.5 to \$5 Million

The distribution graphs below show funds belonging to the second smallest asset class. The Police funds' median in FY 2008 was 63%, but slowly slipped to 50% by FY 2017. The majority of Police funds are over 60% funded, and up until 2015, a few funds reached a funded ratio of over 100%. In FY 2017, however, the highest funded ratio was only 79%. The median of Fire funds in this asset class sit at 70% in FY 2017, with a few over 100%. These superbly well-funded examples may skew the median, but as the graph below shows, the worst of the funds sat at 43%, and only 25% of Fire funds were below a funded ratio of 55%.

CHART 38: Funded Ratio Distribution - \$2.5 to \$5 Million, Police

CHART 39: Funded Ratio Distribution - \$2.5 to \$5 Million, Fire

The aggregate funded ratios of Police and Fire funds belonging to the second largest asset class are much closer than in previous asset class comparisons. The difference by FY 2009 is only 1.1 percentage points, a margin mostly maintained through FY 2015. Data provided to CGFA by the Department of Insurance existed for only a third of Fire funds and an eighth of Police funds in FY 2011, and as such, FY 2011 in the following chart is not an accurate reflection of the funds. While 2016 saw the gap grow due to the Fire funds dropping 8.8%, the gap shrunk slightly in FY 2017, differing by 6.9%.

CHART 40: Funded Ratio - \$5 to \$10 Million

Compared to the previous asset class, Police funds of this size are approximately equally well funded. However, Fire funds are not. Since 2013, half of Police funds were at least 56% funded, while the worst fund was just shy of 30%. Similarly, Fire fund medians were at or above 60% funded ratios every fiscal year except FY 2009, with the least well-funded dropping below 15% once in FY 2016.

CHART 41: Funded Ratio Distribution - \$5 to \$10 Million, Police

CHART 42: Funded Ratio Distribution - \$5 to \$10 Million, Fire

Police and Fire funds with over \$10 million in assets show little to no difference over this 10-year period. The aggregate funded ratios begin in the low 60s, dips to the low 50s in FY 2009, and then recovered to the mid-50s by FY 2017. Over the course of the last 10 years, the funded ratio for Police and Fire funds in this asset class has changed 0.4% and 1.2% respectively.

CHART 43: Funded Ratio - Over \$10 Million

Compared to the distributions of the smaller asset classes, both Police and Fire have more condensed graphs. The median Police and Fire funds closely follow the trajectory of the aggregate ratio on the previous page. Police funds clustered between 52% and 64% funded, while Fire funds pooled most densely in the 50% to 70% range.

CHART 44: Funded Ratio Distribution - Over \$10 Million, Police

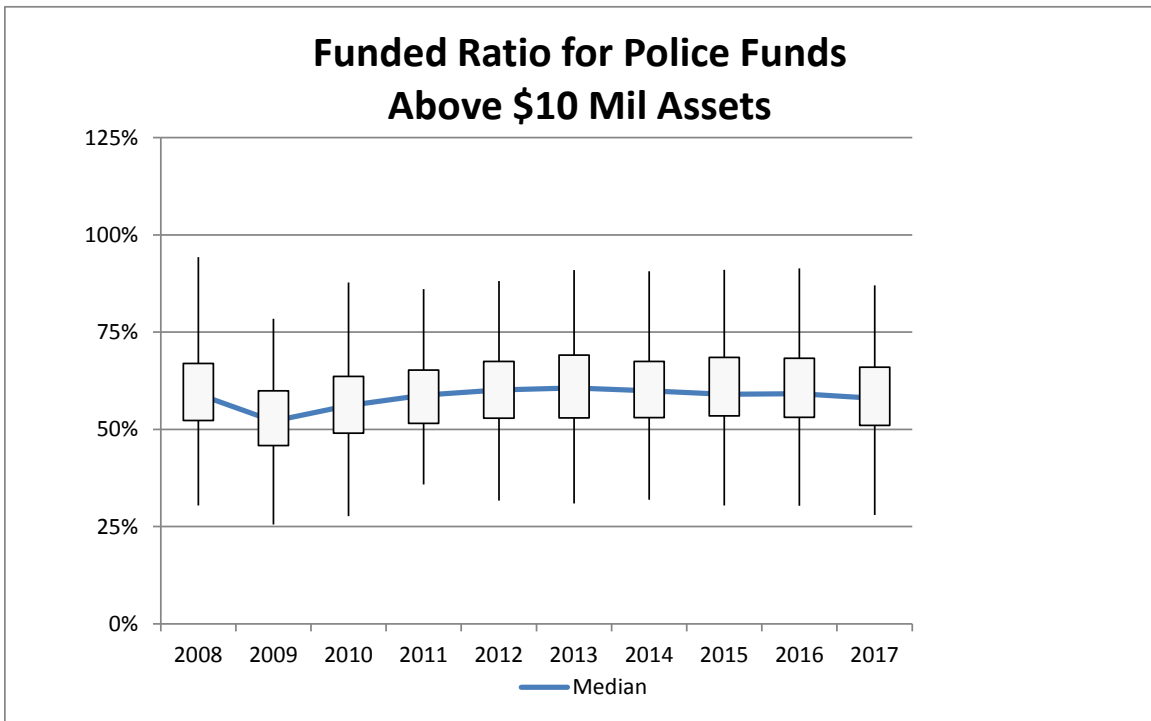

CHART 45: Funded Ratio Distribution - Over \$10 Million, Fire

Rate of Return: The graphs in this section were created by organizing the rates of return for each fund in a given demographic. Of all the variables studied in this report, asset class designation has the greatest effect on rate of return. Hence, the distribution graphs showing all Police and all Fire funds have high variation within each Fiscal Year. Very little differentiates the median Police fund from the median Fire fund, except for the effects of the Great Recession in FY 2009 when more Police funds appeared to feel the impact. Just over 25% of Police funds showed positive returns, while slightly under half of Fire funds accomplished the same feat. Every fund experienced neutral or positive growth in FY 2017.

CHART 46: Rate of Return Distribution - Aggregate, Police

CHART 47: Rate of Return Distribution - Aggregate, Fire

By statute, Police and Fire funds belonging to the smallest asset class have limited exposure to more volatile investments. The effect of this limited investing freedom is evident in the minimal variation of the median rate of return, as well as in the dense clustering around the median. Funds in FY 2009 experienced a slight dip in returns, but the median stayed positive. After FY 2010, 75% of both Police and Fire funds experienced 5% or less on their yearly return.

CHART 48: Rate of Return Distribution - Under \$2.5 Million, Police

CHART 49: Rate of Return Distribution - Under \$2.5 Million, Fire

Once a fund exceeds \$2.5 million in assets, statute allows the opportunity to investment more. Every fiscal year after FY 2009, the median stayed above 3% until FY 2016. In FY 2016, both funds’ medians dropped to 1% before rebounding to 6% (Police) and 7% (Fire). However, riskier returns work both ways: in FY 2009, nearly 75% of Police and Fire funds experienced losses.

CHART 50: Rate of Return Distribution - \$2.5 to \$5 Million, Police

CHART 51: Rate of Return Distribution - \$2.5 to \$5 Million, Fire

In the next asset class, the effects of market exposure are more pronounced. The funds still group closely together around the median, with FY 2017's minimum and maximum being within 3% and 4% of the median, for Police funds, and 5% and 6% for Fire funds. That said, FY 2009 was hard for this asset class, with neither Police nor Fire funds experiencing growth for more than 75% of funds, and less than half of Police funds experiencing returns better than -12% (-9% for Fire).

CHART 52: Rate of Return Distribution - \$5 to \$10 Million, Police

CHART 53: Rate of Return Distribution - \$5 to \$10 Million, Fire

Police and Fire funds belonging to the largest asset class experienced a similar level of variance as the \$5 to \$10 million asset class, with the exception of FY 2009 when the top 25% of both Police and Fire funds saw growth, 6% and 9% respectively. However, in FY 2016, both Police and Fire funds experienced their lowest return of the 10-year span outside of the recession, with medians at 0% for Police funds and 1% for Fire funds. FY 2017 experienced tight clustering after FY 2016, mirroring the growth seen in FY 2010 after the lows of FY 2009.

CHART 54: Rate of Return Distribution - Over \$10 Million, Police

CHART 55: Rate of Return Distribution - Over \$10 Million, Fire

COMMISSION OVERVIEW

The Commission on Government Forecasting & Accountability is a bipartisan legislative support service agency responsible for advising the Illinois General Assembly on economic and fiscal policy issues and for providing objective policy research for legislators and legislative staff. The Commission's board is comprised of twelve legislators—split evenly between the House and Senate and between Democrats and Republicans. Effective December 10, 2018, pursuant to P.A. 100-1148 the former Legislative Research Unit was merged into the Commission.

The Commission has three internal units—Revenue, Pensions, and Research, each of which has a staff of analysts and researchers who analyze policy proposals, legislation, state revenues & expenditures, and benefit programs, and who provide research services to members and staff of the General Assembly. The Commission's staff fulfills the statutory obligations set forth in the Commission on Government Forecasting and Accountability Act (25 ILCS 155/), the State Debt Impact Note Act (25 ILCS 65/), the Illinois Pension Code (40 ILCS 5/), the Pension Impact Note Act (25 ILCS 55/), the State Facilities Closure Act (30 ILCS 608/), the State Employees Group Insurance Act of 1971 (5 ILCS 375/), the Public Safety Employee Benefits Act (820 ILCS 320/), the Legislative Commission Reorganization Act of 1984 (25 ILCS 130/), and the Reports to the Commission on Government Forecasting and Accountability Act (25 ILCS 110/).

- The **Revenue Unit** issues an annual revenue estimate, reports monthly on the state's financial and economic condition, and prepares bill analyses and debt impact notes on proposed legislation having a financial impact on the State. The Unit publishes a number of statutorily mandated reports, as well as on-demand reports, including the Monthly Briefing newsletter and annually, the Budget Summary, Capital Plan Analysis, Illinois Economic Forecast Report, Wagering in Illinois Update, and Liabilities of the State Employees' Group Insurance Program, among others. The Unit's staff also fulfills the agency's obligations set forth in the State Facilities Closure Act.
- The **Pension Unit** prepares pension impact notes on proposed pension legislation and publishes several statutorily mandated reports including the Financial Condition of the Illinois State Retirement Systems, the Financial Condition of Illinois Public Pension Systems and the Fiscal Analysis of the Downstate Police & Fire Pension Funds in Illinois. The Unit's staff also fulfills the statutory responsibilities set forth in the Public Safety Employee Benefits Act.
- The **Research Unit** primarily performs research and provides information as may be requested by members of the General Assembly or legislative staffs. Additionally, the Unit maintains a research library and, per statute, collects information concerning state government and the general welfare of the state, examines the effects of constitutional provisions and previously enacted statutes, and considers public policy issues and questions of state-wide interest. Additionally, the Unit publishes First Reading, a quarterly newsletter which includes abstracts of annual reports or special studies from other state agencies, the Illinois Tax Handbook for Legislators, Federal Funds to State Agencies, various reports detailing appointments to State Boards and Commissions, the 1970 Illinois Constitution Annotated for Legislators, the Roster of Illinois Legislators, and numerous special topic publications.
