Claiborne Wade – Elected School Board Task Force, Kids First Chicago (Uploaded 20 District Map)

"A group led by CPS parents, Kids First Chicago's Elected School Board Task Force, believes the following principles are essential for State lawmakers to follow as they set out to create Chicago's school board districts. -Transparency and inclusivity. -Fair racial representation.

We believe that if lawmakers adhere to these two core principles, then CPS families will be better represented and better served by the future Elected School Board – leading to better outcomes for CPS students.

As much as possible, and consistent with legal and constitutional requirements, the districts should be created in a way that takes into account the racial makeup of CPS students and families. We have created a prototype set of district maps that aims to achieve this goal and serve as a model that it can be done fairly. We encourage lawmakers to look at this example before beginning to draw their own district maps."
